

# Bloomberg News National Poll

SELZER & COMPANY

1,001 U.S. adults ages 18 and over

Margin of error for full sample: ± 3.1 percentage points

Study #2155

July 8-12, 2017

Weighted by age, race, and education

## Poll Questions

**Percentages may not add to 100% due to rounding.**

First, I just need to confirm in what state you live. **(If needed:)** People sometimes take their phone number when they move to another state, so we just need to determine what state I'm talking to.

In general, do you think things in the nation are headed in the right direction, or have they gotten off on the wrong track?

	<b>Right direction</b>	<b>Wrong track</b>	<b>Not sure</b>

Now, I'm going to mention some people and groups in the news recently. [Previous wording: Now, I'd like to mention some major economic and political figures and groups.] For each, please tell me if your feelings are very favorable, mostly favorable, mostly unfavorable, or very unfavorable. If you don't know enough to answer, just say so. (Record "don't know" as "not sure." Rotate list.)

## Methodology

**Jul. 20 (Bloomberg)** -- The Bloomberg News National Poll, conducted Jul. 8-12 for Bloomberg News by Selzer & Co. of Des Moines, IA, is based on interviews with 1,001 U.S. adults ages 18 or older.

Interviewers with Quantel Research contacted households with randomly selected landline and cell phone telephone numbers supplied by Survey Sampling International. Interviews were administered in English.

Percentages based on the full probability sample of 1,001 respondents may have a maximum margin of error of plus or minus 3.1 percentage points. This means that if this survey were repeated using the same questions and the same methodology, 19 times out of 20, the findings would not vary from the percentages shown here by more than plus or minus 3.1 percentage points for questions asked of the general population. Results based on smaller samples of respondents—such as by gender or age—have a larger margin of error. Responses were weighted by age, race, and educational attainment to reflect the general population based on recent census data.
