

US Aggregate Index

The Bloomberg Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, fixed-rate agency MBS, ABS and CMBS (agency and non-agency). Provided the necessary inclusion rules are met, US Aggregate-eligible securities also contribute to the multi-currency Global Aggregate Index and the US Universal Index. The US Aggregate Index was created in 1986, with history backfilled to January 1, 1976.

Historical Composition by Sector (MV%) - Trailing 5 Years*

Historical Composition by Quality (MV%) - Trailing 5 Years*

*Note: 2020 data are as of February 2020.

Rules for Inclusion

Eligible Currencies

Principal and interest must be denominated in USD.

Quality

Securities must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality:

- Local currency treasury and hard currency sovereign issues are classified using the middle issuer level rating from each agency for all outstanding bonds, even if bond level ratings are available.
- Expected ratings at issuance may be used to ensure timely index inclusion or to properly classify split-rated issuers.
- Unrated securities may use an issuer rating for index classification purposes if available. Unrated subordinated securities are included if a subordinated issuer rating is available.

Coupon

- Fixed-rate coupon.
- Callable fixed-to-floating rate bonds are eligible during their fixed-rate term only.
- Bonds with a step-up coupon that changes according to a predetermined schedule are eligible.

Rules for Inclusion

Amount Outstanding	<ul style="list-style-type: none"> • For Treasury, government-related and corporate securities, USD300mn minimum par amount outstanding. • For MBS pass-throughs, pool aggregates must have USD1bn par amount outstanding. • For ABS, USD500mn minimum deal size and USD25mn minimum tranche size. • For CMBS, USD500mn minimum deal size with at least USD300mn amount outstanding remaining in the deal and USD25mn minimum tranche size. • US Treasuries held in the Federal Reserve SOMA account (both purchases at issuance and net secondary market transactions) are deducted from the total amount outstanding. New issuance bought at auction by the Federal Reserve does not enter the index. Net secondary market purchases/sales are adjusted at each month-end with a one-month lag. 				
Maturity	<ul style="list-style-type: none"> • At least one year until final maturity, regardless of optionality. • MBS must have a weighted average maturity of at least one year. CMBS and ABS must have a remaining average life of at least one year. • Bonds that convert from fixed to floating rate, including fixed-to-float perpetuals, will exit the index one year prior to conversion to floating-rate. Fixed-rate perpetuals are not included. • Sub-indices based on maturity are inclusive of lower bounds. Intermediate maturity bands include bonds with maturities of 1 to 9.999 years. Long maturity bands include maturities of 10 years or greater. 				
Market of Issue	<ul style="list-style-type: none"> • SEC-registered securities, bonds exempt from registration at the time of issuance and SEC Rule 144A securities with registration rights are eligible. A security with both SEC Regulation-S (Reg-S) and SEC Rule 144A tranches is treated as one security for index purposes. The 144A tranche is used to prevent double-counting and represents the combined amount outstanding of the 144A and Reg-S tranches. • Global bonds are included. • Bonds that were previously SEC-registered or 144A with registration rights but later deregistered by the issuer remain index eligible. 				
Seniority of Debt	<p>Senior and subordinated issues are included.</p>				
Taxability	<ul style="list-style-type: none"> • Only fully taxable issues are eligible. • Build America Bonds (BAB) with the tax credit to the issuer are eligible; those with tax credits issued to investors are considered tax exempt. • Dividend Received Deduction (DRD) and Qualified Dividend Income (QDI) eligible securities are excluded. 				
Security Types	<table border="0"> <thead> <tr> <th data-bbox="389 1239 941 1291">Included</th> <th data-bbox="941 1239 1523 1291">Excluded</th> </tr> </thead> <tbody> <tr> <td data-bbox="389 1291 941 1732"> <ul style="list-style-type: none"> • Bullet, puttable, sinkable/amortizing and callable bonds • Taxable municipal securities, including Build America Bonds (BAB) • Original issue zero coupon and underwritten MTN • Enhanced equipment trust certificates (EETC) • Certificates of deposit • Fixed-rate and fixed-to-float (including fixed-to-variable) capital securities • Covered bonds (as of January 1, 2011) • US agency CMBS (as of July 1, 2014) </td> <td data-bbox="941 1291 1523 1732"> <ul style="list-style-type: none"> • Contingent capital securities, including traditional CoCos and contingent write-down securities • Bonds with equity type features (eg, warrants, convertibles, preferreds, DRD/QDI-eligible issues) • Tax-exempt municipal securities • Inflation-linked bonds, floating-rate issues • Private placements, retail bonds • USD25/USD50 par bonds • Structured notes, pass-through certificates • Non-ERISA eligible CMBS issues • CMBS A1A tranches (as of January 1, 2011) • Illiquid securities with no available internal or third-party pricing source </td> </tr> </tbody> </table>	Included	Excluded	<ul style="list-style-type: none"> • Bullet, puttable, sinkable/amortizing and callable bonds • Taxable municipal securities, including Build America Bonds (BAB) • Original issue zero coupon and underwritten MTN • Enhanced equipment trust certificates (EETC) • Certificates of deposit • Fixed-rate and fixed-to-float (including fixed-to-variable) capital securities • Covered bonds (as of January 1, 2011) • US agency CMBS (as of July 1, 2014) 	<ul style="list-style-type: none"> • Contingent capital securities, including traditional CoCos and contingent write-down securities • Bonds with equity type features (eg, warrants, convertibles, preferreds, DRD/QDI-eligible issues) • Tax-exempt municipal securities • Inflation-linked bonds, floating-rate issues • Private placements, retail bonds • USD25/USD50 par bonds • Structured notes, pass-through certificates • Non-ERISA eligible CMBS issues • CMBS A1A tranches (as of January 1, 2011) • Illiquid securities with no available internal or third-party pricing source

Rebalancing Rules

Frequency	For each index, Bloomberg maintains two universes of securities: the Returns (Backward) and the Projected (Forward) Universes. The composition of the Returns Universe is rebalanced at each month-end and represents the fixed set of bonds on which index returns are calculated for the next month. The Projected Universe is a forward-looking projection that changes daily to reflect issues dropping out of and entering the index but is not used for return calculations. On the last business day of the month (the rebalancing date), the composition of the latest Projected Universe becomes the Returns Universe for the following month.
Index Changes	During the month, indicative changes to securities (credit rating change, sector reclassification, amount outstanding changes, corporate actions, and ticker changes) are reflected daily in the Projected and Returns Universe of the index. These changes may cause bonds to enter or fall out of the Projected Universe of the index on a daily basis, but will affect the composition of the Returns Universe at month-end only, when the index is next rebalanced.
Reinvestment of Cash Flows	Intra-month cash flows from interest and principal payments contribute to monthly index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the Returns Universe for the following month so that index results over two or more months reflect monthly compounding.
New Issues	Qualifying securities issued, but not necessarily settled on or before the month-end rebalancing date, qualify for inclusion in the following month's index if the required security reference information and pricing are readily available.

Pricing and Related Issues

Sources & Frequency	<ul style="list-style-type: none"> Index-eligible bonds are priced on a daily basis by Bloomberg's evaluated pricing service, BVAL. MBS generics are priced daily based on a weighted average price of underlying pools. The pools are priced by BVAL on a same-day settlement basis.
Pricing Quotes	Bonds are marked on a dollar price basis.
Timing	<ul style="list-style-type: none"> 3pm (New York time) for all securities except taxable municipal bonds which use 4pm (New York time). On early market closes, prices are taken as of 1pm (New York time), unless otherwise noted. If the last business day of the month is a public holiday, prices from the previous business day are used.
Bid or Offer Side	Bonds in the index are priced on the bid side. The initial price for new corporate issues entering the index is the offer side; after the first month, the bid price is used.
Settlement Assumptions	T+1 calendar day settlement basis for all bonds except MBS, which use same-day settlement. At month-end, settlement is assumed to be the first calendar day of the following month, even if the last business day is not the last day of the month, to allow for one full month of accrued interest to be calculated.
Verification	Daily price moves for each security are analyzed by the index pricing team to identify outliers. Index users may also challenge price levels, which are then reviewed and updated as needed.
Currency Hedging	Returns hedged to various non-USD currencies are published for the US Aggregate Index. The indices' FX hedging methodology takes rolling one-month forward contracts that are reset at the end of each month and hedges each non-reporting currency-denominated bond in the index into the reporting currency terms. No adjustment is made to the hedge during the month to account for price movements of constituent securities in the Returns Universe of the index.
Calendar	The US Aggregate Index follows the US bond market holiday schedule.

Index History

June 1, 2017	Hybrid ARMs removed from the index.
April 1, 2017	Liquidity constraint raised to USD300mn from USD250m for Treasury, Government-Related and Corporate securities.
July 1, 2014	US agency CMBS added to the index.
June 1, 2014	Global classification scheme modified to incorporate new sectors, sector name changes and sector retirements.
April 1, 2014	Minimum liquidity for US MBS Index constituents raised from USD250mn to USD1bn.
April 1, 2013	Loan participation notes (LPNs) eligible for the index.
May 1, 2012	Issuer eligibility for fixed-rate ABS no longer based on a predefined list of "eligible" issuers.
January 1, 2011	Covered bonds become eligible. A1A tranches are removed from the CMBS portion of the index.
October 1, 2009	US ABS home equity sector removed from the index.
January 1, 2008	Fixed-to-floating rate perpetual securities without a coupon step-up on their first call date eligible for inclusion. US MBS fixed-rate balloons and US ABS manufactured housing removed.
April 1, 2007	Agency Hybrid Adjustable Rate Mortgage (ARM) securities added to the index, but not eligible for the Global Aggregate.
July 1, 2005	Fitch ratings added to Moody's and S&P to determine index eligibility based on the middle rating from each agency.
July 1, 2004	Liquidity constraint raised to USD250mn/USD25mn CMBS tranche size from USD200mn.
October 1, 2003	Liquidity constraint raised to USD200mn from USD150mn. Capital and senior unsecured securities with fixed-to-variable coupons added to the index. Lower of Moody's and S&P rating used to determine index eligibility; previously, Moody's was used as the primary rating with S&P rating used in cases where a Moody's rating was unavailable.
July 1, 2000	ABS liquidity constraint raised to USD500mn for deal size and USD25mn for tranche size. Absorbed all Yankee corporates into their respective industry and sector classification.

March 04, 2020

July 1, 1999	Liquidity constraint raised to USD150mn from USD100mn. ERISA-eligible CMBS issues added to the index.
January 1, 1998	Removed US TIPS from US Aggregate Index.
January 1, 1994	Liquidity constraint raised to USD100mn from USD50mn for non-government securities.
January 1, 1992	ABS and MBS balloon issues added to the index. Liquidity constraint increased to USD50mn from USD25mn for non-government securities.
January 1, 1990	Liquidity constraint raised to USD100mn from USD25mn for government issues.
August 1, 1988	Liquidity constraint raised to USD25mn from USD1mn for corporate issues.
January 1, 1986	US Aggregate Index introduced, with historical data backfilled to January 1976.

Sub-indices and Index Customizations

Bloomberg publishes numerous sub-indices of flagship indices and bespoke benchmarks created for specific index users. Several types of bespoke indices are available to select or customize the most appropriate benchmark for specific portfolio needs:

Sub-Index Type	Description	Examples
Enhanced Constraint	Applies a more or less stringent set of constraints to any existing index.	<ul style="list-style-type: none">• US Aggregate ex Baa• US Aggregate 1-3 Year
Composites	Investors assign their own weights to sectors or other index sub-components within an overall index.	<ul style="list-style-type: none">• 50% US Aggregate; 50% Euro Aggregate• 30% US Government-Related; 70% US MBS
Issuer Constrained	Indices that cap issuer exposure to a fixed percentage. Options available for applying issuer caps and redistributing excess MV to other issuers.	<ul style="list-style-type: none">• US Credit 2% Issuer Capped
Float Adjusted	Adjusts par amount outstanding of bonds for holdings of central governments that are publicly available.	<ul style="list-style-type: none">• US Aggregate Float Adjusted
ESG Screened/Weighted	Applies Environmental, Social and Governance filters and/or tilts to a standard index.	<ul style="list-style-type: none">• US Aggregate Socially Responsible Index• US Aggregate ESG Weighted
Mirror Futures Index (MFI)	An index consisting of 14 funded futures contracts weighted to match closely the beginning-of-month OAD of the index.	<ul style="list-style-type: none">• US Aggregate Mirror Futures Index
Duration Hedged	Indices constructed to reflect the underlying return of an index with its duration fully or partially hedged using its MFI.	<ul style="list-style-type: none">• US Aggregate Duration Hedged Index

Accessing Index Data

Bloomberg Terminal®	<p>Bloomberg benchmarks are the global standard for capital markets investors.</p> <ul style="list-style-type: none"> • INDEX<Go> – The Bloomberg Indices landing page is a dashboard for index-related information on the terminal. Find daily and monthly index returns for key indices from each index family as well as index publications including methodologies, factsheets, monthly reports, updates and alerts. • IN<Go> – The Bloomberg Index Browser displays the latest performance results and statistics for the indices as well as history. IN presents the indices that make up Bloomberg's global, multi-asset class index families into a hierarchical view, facilitating navigation and comparisons. The "My Indices" tab allows a user to focus on a set of favorite indices. • PORT<Go> – Bloomberg's Portfolio & Risk Analytics solution includes tools to analyze the risk, return, and current structure of indices. Analyze the performance of a portfolio versus a benchmark or use models for performance attribution, tracking error analysis, value-at-risk, scenario analysis, and optimization. • DES<Go> – The index description page provides transparency into an individual index including membership information, aggregated characteristics and returns, and historical performance.
Bloomberg Indices Website (www.bloomberg.com/professional/product/indices)	<p>The index website makes available limited index information including:</p> <ul style="list-style-type: none"> • Index methodology and factsheets • Current performance numbers for select indices
Data Distribution	<p>Index subscribers may choose to receive index data in files. Files may include:</p> <ul style="list-style-type: none"> • Index level and/or constituent level returns and characteristics for any indices • Automatic delivery of files via email or SFTP following the completion of the index production process after market close • Clients may receive standard files or may customize file contents • Index data is also available via authorized redistributors

Bloomberg Total Return Index Value Tickers: US Aggregate and Related Indices
