UNLOCK THE EXPERIENCE

Breaking News!

FIGI is now available on the Beijing Exchange

In November 2021, China introduced the Beijing Stock Exchange which mainly serves small and medium-sized enterprises (SME). A total of 81 companies started trading on the official launch date. Beijing exchange is the third official equity stock exchange (apart from Shanghai & Shenzhen) in China. All the BJSE tickers have been added to the OpenFIGI database and the new exchange code is JC. FIGI Assignment continues to climb with KAIKO

Currently over 800 FIGIs have been assigned to Crypto Coins as seen [here](#). FIGIs are also assigned to over 1900 trading pairs ([seen here](#)) to add more granularity. Lastly, FIGIs are allocated at the Trading Venue (instrument) level. These 4900+ instruments have the designation 'SPOT' which can be seen [here](#) (be sure to add all "Additional Columns"). FIGI coverage supports efficient trading of these assets by offering unambiguous identification across three levels of granularity.

A New FIGI Facilitator: Dataroma.com

Dataroma tracks portfolios of prominent Super investors by extracting data from financial filings. The data is consolidated, categorized and presented in an easily accessible form. They also provide real-time Insider Transaction data collated from the SEC.

DATAROMA

"Open Symbology/FIGI substantially simplifies the task of mapping various security identifiers and keeping track of changes in security ticker, name, issue code, etc. Importantly, the free, open standard makes it available to all institutions large or small." – Sina Geranpay, Founder and Owner of Dataroma

Expanding the Footprint of FIGI

Rich Robinson was the MC at ISITC's Annual Securities Operations Summit. He also spoke on a panel on Common Standards and presented on the expansion of FIGI into crypto with Kaiko at the Reference Data Working Group.

You can also read about his recent interview on crypto on [finadium.com](#) ([Click here to see](#)) and finally his blog about how FIGI adapts to, and innovates with financial markets. ([Click here to see](#))
