FYSA.

TSAR Tokyo continues to coordinate the transfer of medical personnel and pharmaceuticals arriving at Haneda International Airport in support of the Diamond Princess evacuation of AMCITS.

Our daily task force meeting is at 2100 (EST) and I will update any new developments.

Below please find information provided to AMCITS on evacuation procedures.

February 16, 2020

U.S. Embassy Tokyo

INFORMATION FOR U.S. CITIZENS- DIAMOND PRINCESS

As we notified you yesterday, the U.S. Government recommends that U.S. citizens disembark from the Diamond Princess and return to the United States. This is a rapidly evolving situation and we are taking additional steps to assist U.S. citizens. Please know the safety and well-being of our citizens is the U.S. Government's top priority. To this end, the U.S. government has chartered flights that will depart Yokohama to the United States on Sunday, February 16. These charter flights are the only opportunity for eligible passengers to fly to the United States until March 4, 2020, at the earliest. This date is 14 days after the remaining passengers are expected to depart the ship on February 19.

Based on the high number of COVID-19 cases identified onboard the Diamond Princess, the Department of Health and Human Services made an assessment that passengers and crew members onboard are at high risk of exposure. Given this assessment, the U.S. Government is chartering these flights to minimize the risks to your health going forward.

In order to ensure a smooth repatriation process to the United States, the U.S. Embassy in Tokyo requires your response **by 10:00 am Tokyo time**. As you consider whether to take advantage of this option, we are sharing additional information with you about these onward arrangements:

- Health authorities will screen all passengers prior to allowing them to board the chartered flights. No symptomatic or infected passengers will be allowed to board.
- Passengers on the chartered aircraft will be quarantined in the United States at Travis Air Force Base in Fairfield, California or Lackland Air Force Base near San Antonio, Texas for 14 days upon arrival. These sites were specifically selected to ensure health care facilities are immediately available in the vicinity to treat any medical needs.
- Medical professionals will be present on the flights to provide medical care, if needed. You will have access to medication and medical care at all times.
- If your immediate family member is not a U.S. citizen, they will also be accommodated on these flights.
- **You will not be liable for the cost of the chartered flights to the United States.** However, after your quarantine in the United States, you will be responsible for your onward travel to your home.
- We would like to highlight potential constraints that would impact your return to the United States in the next two weeks if you choose not to take these flights and instead choose to remain on the ship until February 19. After you disembark from the Diamond Princess, under U.S. quarantine orders, you will be required to wait 14 days without symptoms and positive test results before you are permitted to board commercial flights to the United States.
- Governments in the region have been implementing fast changing travel rules in regard to individuals who have been in high risk environments for exposure to COVID-19. These charter flights are your only option to fly to the United States before March 4, 2020, at the earliest.

If you reside in Japan, or another location outside of the United States, and therefore elect not to use the chartered transportation, after you disembark you may be subject to abide by local quarantine and health monitoring obligations as required by the Government of Japan or your local health authorities.

Thank you again for your patience and cooperation. These measures are consistent with the most current medical assessments available, and the careful policies we have instituted to limit the potential spread of the virus. We are deeply grateful to the Government of Japan, Carnival Cruise Line, and public health authorities around the world, who are working diligently to contain and control the spread of the illness. We reiterate our deep appreciation for your patience and understanding.

Please note, if Embassy Tokyo has already received your response regarding the charter flights, you do not need to reply again.

Subject: Proclamation on Suspension of Entry as Immigrants and Nonimmigrants of Persons who Pose a Risk of Transmitting 2019 Novel Coronavirus

Office of the Press Secretary

FOR IMMEDIATE RELEASE

January 31, 2020

SUSPENSION OF ENTRY AS IMMIGRANTS AND NONIMMIGRANTS OF PERSONS
WHO POSE A RISK OF TRANSMITTING 2019 NOVEL CORONAVIRUS AND
OTHER APPROPRIATE MEASURES TO ADDRESS THIS RISK

- - - - -

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

The United States has confirmed cases of individuals who have a severe acute respiratory illness caused by a novel (new) coronavirus ("2019-nCoV") ("the virus") first detected in Wuhan, Hubei Province, People's Republic of China ("China").

The virus was discovered in China in December 2019. As of January 31, 2020, Chinese health officials have reported approximately 10,000 confirmed cases of 2019-nCoV in China, more than the number of confirmed cases of Severe Acute Respiratory Syndrome (SARS) during its 2003 outbreak. An additional 114 cases have been confirmed across 22 other countries; in several of these cases, the infected individuals had not visited China. More than 200 people have died from the virus, all in China.

Coronaviruses are a large family of viruses. Some cause illness in people and others circulate among animals, including camels, cats, and bats. Animal coronaviruses are capable of

evolving to infect people and subsequently spreading through human-to-human transmission. This occurred with both Middle East Respiratory Syndrome and SARS. Many of the individuals with the earliest confirmed cases of 2019-nCoV in Wuhan, China had some link to a large seafood and live animal market, suggesting animal-to-human transmission. Later, a growing number of infected individuals reportedly did not have exposure to animal markets, indicating human-to-human transmission.

Chinese officials now report that sustained human-to-human transmission of the virus is occurring in China.

Manifestations of severe disease have included severe pneumonia, acute respiratory distress syndrome, septic shock, and multi-organ failure.

Neighboring jurisdictions have taken swift action to protect their citizens by closing off travel between their territories and China. On January 30, 2020, the World Health Organization declared the 2019-nCoV outbreak a public health emergency of international concern.

Outbreaks of novel viral infections among people are always of public health concern, and older adults and people with underlying health conditions may be at increased risk. Public health experts are still learning about the severity of 2019-nCoV. An understanding of the key attributes of this novel virus, including its transmission dynamics, incubation period, and severity, is critical to assessing the risk it poses to the American public. Nonetheless, the Centers for Disease Control and Prevention (CDC) has determined that the virus presents a serious public health threat.

The CDC is closely monitoring the situation in the United States, is conducting enhanced entry screening at 5 United States airports where the majority of travelers from Wuhan arrive, and is enhancing illness response capacity at the 20 ports of entry where CDC medical screening stations are located. The CDC is also supporting States in conducting contact investigations of confirmed 2019-nCoV cases identified

within the United States. The CDC has confirmed that the virus has spread between two people in the United States, representing the first instance of person-to-person transmission of the virus within the United States. The CDC, along with state and local health departments, has limited resources and the public health system could be overwhelmed if sustained human-to-human transmission of the virus occurred in the United States. Sustained human-to-human transmission has the potential to have cascading public health, economic, national security, and societal consequences.

During Fiscal Year 2019, an average of more than 14,000 people traveled to the United States from China each day, via both direct and indirect flights. The United States Government is unable to effectively evaluate and monitor all of the travelers continuing to arrive from China. The potential for widespread transmission of the virus by infected individuals seeking to enter the United States threatens the security of our transportation system and infrastructure and the national security. Given the importance of protecting persons within the United States from the threat of this harmful communicable disease, I have determined that it is in the interests of the United States to take action to restrict and suspend the entry into the United States, as immigrants or nonimmigrants, of all aliens who were physically present within the People's Republic of China, excluding the Special Autonomous Regions of Hong Kong and Macau, during the 14-day period preceding their entry or attempted entry into the United States. I have also determined that the United States should take all necessary and appropriate measures to facilitate orderly medical screening and, where appropriate, quarantine of persons allowed to enter the United States who may have been exposed to this virus.

NOW, THEREFORE, I, DONALD J. TRUMP, President of the United States, by the authority vested in me by the Constitution and the laws of the United States of America, including sections 212(f) and 215(a) of the Immigration and Nationality Act (INA), 8 U.S.C. 1182(f) and 1185(a), and section 301 of title 3,

United States Code, hereby find that the unrestricted entry into the United States of persons described in section 1 of this proclamation would, except as provided for in section 2 of this proclamation, be detrimental to the interests of the United States, and that their entry should be subject to certain restrictions, limitations, and exceptions. I therefore hereby proclaim the following:

Section 1. Suspension and Limitation on Entry. The entry into the United States, as immigrants or nonimmigrants, of all aliens who were physically present within the People's Republic of China, excluding the Special Autonomous Regions of Hong Kong and Macau, during the 14-day period preceding their entry or attempted entry into the United States is hereby suspended and limited subject to section 2 of this proclamation.

Sec. 2. Scope of Suspension and Limitation on Entry.

(a) Section 1 of this proclamation shall not apply to:

(i) any lawful permanent resident of the United States;

(ii) any alien who is the spouse of a U.S. citizen or lawful permanent resident;

(iii) any alien who is the parent or legal guardian of a U.S. citizen or lawful permanent resident, provided that the U.S. citizen or lawful permanent resident is unmarried and under the age of 21;

(iv) any alien who is the sibling of a U.S. citizen or lawful permanent resident, provided that both are unmarried and under the age of 21;

(v) any alien who is the child, foster child, or ward of a U.S. citizen or lawful permanent resident, or who is

a prospective adoptee seeking to enter the United States pursuant to the IR-4 or IH-4 visa classifications;

(vi) any alien traveling at the invitation of the United States Government for a purpose related to containment or mitigation of the virus;

(vii) any alien traveling as a nonimmigrant under section 101(a)(15)(C) or (D) of the INA, 8 U.S.C. 1101(a)(15)(C) or (D), as a crewmember or any alien otherwise traveling to the United States as air or sea crew;

(viii) any alien seeking entry into or transiting the United States pursuant to an A-1, A-2, C-2, C-3 (as a foreign government official or immediate family member of an official), G-1, G-2, G-3, G-4, NATO-1 through NATO-4, or NATO-6 visa;

(ix) any alien whose entry would not pose a significant risk of introducing, transmitting, or spreading the virus, as determined by the CDC Director, or his designee;

(x) any alien whose entry would further important United States law enforcement objectives, as determined by the Secretary of State, the Secretary of Homeland Security, or their respective designees based on a recommendation of the Attorney General or his designee; or

(xi) any alien whose entry would be in the national interest, as determined by the Secretary of State, the Secretary of Homeland Security, or their designees.

(b) Nothing in this proclamation shall be construed to affect any individual's eligibility for asylum, withholding of removal, or protection under the regulations issued pursuant to the legislation implementing the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, consistent with the laws and regulations of the United States.

Sec. 3. Implementation and Enforcement.

(a) The Secretary of State shall implement this proclamation as it applies to visas pursuant to such procedures as the Secretary of State, in consultation with the Secretary of Homeland Security, may establish. The Secretary of Homeland Security shall implement this proclamation as it applies to the entry of aliens pursuant to such procedures as the Secretary of Homeland Security, in consultation with the Secretary of State, may establish.

(b) Consistent with applicable law, the Secretary of State, the Secretary of Transportation, and the Secretary of Homeland Security shall ensure that any alien subject to this proclamation does not board an aircraft traveling to the United States.

(c) The Secretary of Homeland Security may establish standards and procedures to ensure the application and implementation of this proclamation at United States seaports and in between all ports of entry.

(d) An alien who circumvents the application of this proclamation through fraud, willful misrepresentation of a material fact, or illegal entry shall be a priority for removal by the Department of Homeland Security.

Sec. 4. Orderly Medical Screening and Quarantine.

The Secretary of Homeland Security shall take all necessary and appropriate steps to regulate the travel of persons and aircraft to the United States to facilitate the orderly medical screening and, where appropriate, quarantine of persons who enter the United States and who may have been exposed to the virus. Such steps may include directing air carriers to restrict and regulate the boarding of such passengers on flights to the United States.

Sec. 5. Termination.

This proclamation shall remain in

effect until terminated by the President. The Secretary of Health and Human Services shall, as circumstances warrant and no more than 15 days after the date of this order and every 15 days thereafter, recommend that the President continue, modify, or terminate this proclamation.

Sec. 6. Effective Date. This proclamation is effective at 5:00 p.m. eastern standard time on February 2, 2020.

Sec. 7. Severability. It is the policy of the United States to enforce this proclamation to the maximum extent possible to advance the national security, public safety, and foreign policy interests of the United States. Accordingly:

(a) if any provision of this proclamation, or the application of any provision to any person or circumstance, is held to be invalid, the remainder of this proclamation and the application of its provisions to any other persons or circumstances shall not be affected thereby; and

(b) if any provision of this proclamation, or the application of any provision to any person or circumstance, is held to be invalid because of the lack of certain procedural requirements, the relevant executive branch officials shall implement those procedural requirements to conform with existing law and with any applicable court orders.

Sec. 8. General Provisions. (a) Nothing in this proclamation shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This proclamation shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This proclamation is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of January, in the year of our Lord two thousand twenty, and of the Independence of the United States of America the two hundred and forty-fourth.

DONALD J. TRUMP

Colleagues,

To start, a few congratulations that are in order...

- Congrats to our own Erick Rekstad who was selected as the Executive Director for Analysis and Engineering. Erick is exceptionally qualified for this position. This selection was made from the most talented field of applicants I have ever seen; thanks to those of you in RCA who also applied. Erick...well done.
- Congrats to Chan Heng of the Chemistry and Explosives Branch (CEB) who accepted on behalf of TSA the Patriotic Employer Award by the Employer Support of the Guard and Reserve (ESGR). The ESGR is a DOD program that was established in 1972 to promote cooperation and understanding between Reserve Component Service members and their civilian employers and to assist in the resolution of conflicts arising from an employee's military commitment. Major Justin Krowicki, an explosives specialist with the CEB, recommended Chan for this award for recognizing the importance of his continued service to the NJ Air National Guard while still an employee of TSA. Major Krowicki, who planned to return to TSA in April, will be extended an additional few months. Congrats to Chan and team and thank you to Major Krowicki for his continued service!

Congrats again to Nick Bianchini who received the Meritorious Senior Professional Award today during the TSA Presidential Rank Awards Ceremony. The Presidential Rank

Awards recognize extraordinary achievements by career executives in federal service and provide the opportunity to recognize the top individuals who have made significant and lasting contributions to their agency. This honor is one of the highest awards bestowed upon career government executives by the President of the United States. Nick was recognized by Administrator Pekoske and TSA's senior leadership for his outstanding contributions to not only the mission of TSA, DHS, and the federal government, but also to the international transportation security community for his work to advance global detection standards and raise the security baseline. Please see the below; I am sure you will agree that he looks excited and that the boutonniere was a nice touch.

(b) (6)

- Congrats to the inaugural members of RCA's Employee Advisory Council! Keith and I will be looking to the EAC a lot to specifically help address the Climate Survey results and generally to provide input to leadership regarding ideas that will make RCA an increasingly better place to work. I am here for you...please let me know when you would like to engage—I anticipate a very productive slate for this group. Thanks also for stepping up; we have a nice cross section from across RCA.

Welcome back to Keith who was traveling with Nick Bianchini and Don Kim these past two weeks in Australia (February 27-28) and New Zealand (March 2-4). The purpose of the trip was to provide an opportunity for in depth technical discussions with representatives from TSA's closest international partners. In addition to bilateral briefings in classified settings, RCA delivered a presentation on TSA Detection Requirements, Capability Management, and Chemical Threat updates to approximately 80 personnel from Australia Department of Home Affairs (Home Affairs) - Aviation and Maritime Security Group (AMS), while streaming to multiple locations throughout Australia; and participated in the National Program Recognition meeting with the Civil Aviation Authority of New Zealand (CAANZ), and New Zealand Aviation Security Service (NZ Avsec). RCA also progressed work underway with Home

Affairs - AMS and the Australian Defence Science and Technology Group on a Technical Annex for the advancement of technical research, including transportation security screening algorithm development under the S&T Cooperation in Homeland/Domestic Security Agreement, and propose similar work streams with CAANZ and NZ Avsec. Overall, this trip was a great opportunity to advance TSA's international technology engagement with key partners and act as an entry to additional areas for future collaboration. Thanks for the great work!

As a general reminder, we are hearing more and more about Coronavirus. Unfortunately, I think this will be an increased area of concern as we move forward from both the professional and personal sides. I expect increased communication and efforts by DHS that ultimately might trickle out of the airport environment and affect how we all at HQ travel and work. Please be smart to protect yourselves and your loved ones by being diligent with the simple steps such as hand washing and disinfecting surfaces. For more information on the Coronavirus, please check out this link from the CDC: https://www.cdc.gov/coronavirus/2019-ncov/about/share-facts.html?CDC_AA_refVal=https://www.cdc.gov/coronavirus/2019-ncov/about/share-facts-stop-fear.html. Also, review the attached guidance distributed by TSA on general prevention reminders. On a personal note, I appreciate the professionalism (i.e. levelheadedness) with which you all have approached this issue. Thank you!!

Last...my morale suggestion for the week. Tomorrow is one of the best days of the year in Old Town Alexandria. They celebrate St. Patrick's Day early, so that the same groups can march in the DC Parade. Things start off with the "Fun Dog Show" from 1030 to 1200 on Market Square in front of City Hall. You wouldn't believe how people dress the poor animals. The parade itself runs from 1215-1400, and runs down King Street between Alfred and Lee Street. (b) (6) likely in the 700 block of King Street generally across from Murphy's. Early-goers may find us enjoying breakfast in Murphy's. After the parade we will likely be in Virtue (I think Murphy's is 21 and over; regardless it will be slammed). Come one, come all; the forecast is for sunny and 50!!

Have a great weekend! -- a

The CDC has issued a Level 1 Global Travel Watch in response to COVID-19. Please visit the CDC page for more information about this notice and for more information about COVID-19.

Due to the CDC's Level 1 Global Travel Watch, the Department of State has issued a Global Level 2 Health Advisory advising U.S. citizen travelers and those residing abroad to exercise increased caution due to COVID-19.

You are encouraged to visit travel.state.gov to view individual country Travel Advisories for the most urgent threats to safety and security. Please also visit the website of the relevant U.S. embassy or consulate to see information on entry restrictions, foreign quarantine policies, and urgent health information provided by local governments.

Travelers are urged to enroll in the [Smart Traveler Enrollment Program \(STEP\)](#) to receive Alerts and make it easier to locate you in an emergency. The Department uses these Alerts to convey information about terrorist threats, security incidents, planned demonstrations, natural disasters, etc. In an emergency, please contact the nearest U.S. Embassy or Consulate or call the following numbers: 1(888) 407-4747 (toll-free in the United States and Canada) or 1 (202) 501-4444 from other countries.

For further information:

- Consult the [CDC website](#) for the most up-to-date information.
- For the most recent information on what you can do to reduce your risk of contracting COVID-19 please see the [CDC's latest recommendations](#).
- Check with your airlines or cruise lines regarding any updated information about your travel plans and/or restrictions.
- Visit our Embassy webpages on COVID-19 for information on conditions in each country.
- Visit the [Department of Homeland Security's website](#) on the latest travel restrictions to the U.S.
- Seek medical care right away if you believe you may have COVID-19 (or similar symptoms) or were exposed to someone who may have COVID-19 in the last six weeks.
