First, I just need to confirm in what state you live. **(If needed:)** People sometimes take their phone number when they move to another state, so we just need to determine what state I'm talking to.

In general, do you think things in the <u>nation</u> are headed in the right direction, or have they gotten off on the wrong track?

Methodology

December 8 (Bloomberg) -- The Bloomberg News National Poll, conducted Dec. 2-5 for Bloomberg News by Selzer & Co. of Des Moines, IA, is based on interviews with 999 U.S. adults ages 18 or older.

Interviewers with Quantel Research contacted households with randomly selected landline and cell phone telephone numbers supplied by Survey Sampling International. Interviews were administered in English.

Percentages based on the full probability sample of 999 respondents may have a maximum margin of error of plus or minus 3.1 percentage points. This means that if this survey were repeated using the same questions and the same methodology, 19 times out of 20, the findings would not vary from the percentages shown here by more than plus or minus 3.1 percentage points for questions asked of the general population. Results based on smaller samples of respondents—such as by gender or age—have a larger margin of error. Responses were weighted by age, race, and educational attainment to reflect the general population based on recent census data.
