Mr. Gensler,

I am reaching out to point out I have concerns over what I am hearing about the upcoming Truth social merger with Digital Media Group .It is being presented that the recent filings are missing several material disclosures. I sincerely hope that your oversight is being directed to this transaction and ensure that all requirements are met. The oversight we trust the SEC with is needed to protect us retail investors. I need to know that everyone has to meet set requirements and guidelines.

Thank you for your consideration in this matter.

Subject: American Citizen Concern:Trump Media Merger

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Trump Media SPAC will probably go bankrupt like all the other businesses he has started in the pass. His SPAC disclosures doesn't acknowledge his NYC fraud 454 million nor his 83.3 million in liability for rape. I would think these things should be included. His outstanding debt should be noted. The stakeholders should know all relevant information about a potential business dealing or a potential person they're doing business with. Yes, I know these things have been on the news and in newspapers. But I believe you need to protect people even from themselves at times

I am concerned that lots of my American countrymen will lose their retirement, initial Investments, possible homes, please I know it's something that you all can do that can help protect these people even from themselves. If nothing at all can be done to stop Trump media from merging with this company then can y'all at least force him to disclose the overwhelming fraud debt and the debt from the liability of the rape I think stakeholders at the minimum to see that in black and white print included in that disclosure.

Thank you sincerely (b)(6) for taking the time to read my email.

Subject: Donald Trump Disclosures in SPAC Filings

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Sir

I have concerns Re: Donald Trump's disclosures for the SPAC merger between DWAC and Truth Social.

A number of issues WERE NOT disclosed: Recent Court Judgements in New York State.

This is a problem and raises concerns for me.

Could you please investigate this on my behalf?

Respectfully yours,

(b)(6)

Subject: Crucial disclosures were conspicuously omitted - S-4 Truth Social

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Chairman Gary Gensler,

I am writing to you today to express my profound dissatisfaction and concern regarding a recent decision made under your leadership at the Securities and Exchange Commission (SEC). It has come to my attention that the SEC approved a registration statement filed on November 13, 2023, by Digital World Acquisition Corp., under Registration No. 333-264965. My concern specifically pertains to Amendment No. 1 to Form S-4, where it appears crucial disclosures were conspicuously omitted.

Upon review of the document, it is glaringly apparent that Page 123 lacks essential disclosures that are not only pivotal for the transparency and integrity of the financial markets but also for the protection of investors. It is disconcerting to note that significant information concerning past criminal convictions of rape and convictions related to defrauding New York State, involving key figures of the company, were not disclosed. This omission raises grave concerns about the adherence to the SEC's own rules and regulations, which are designed to ensure full and fair disclosure to protect investors and maintain fair, orderly, and efficient markets.

The SEC's mission, as I understand it, is to protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation. The cornerstone of this mission is the requirement for complete and accurate disclosure of material information that may affect an investor's decision-making process. The omission of such critical information not only undermines the very foundation of the SEC's mission but also erodes public trust in the regulatory framework supposed to protect them.

In light of these concerns, I am compelled to question the approval process that allowed such an omission to go unchecked. How did the SEC's review process fail to identify and rectify the absence of such crucial information? Does this oversight not indicate a deviation from the Commission's commitment to uphold its own standards and regulations? Furthermore, this incident brings into question the effectiveness of the SEC's oversight and enforcement capabilities, which are crucial for maintaining the integrity of the securities markets.

I urge you to provide a detailed explanation for this oversight and to outline the steps the SEC intends to take to rectify this situation. It is imperative that the SEC reassess its review processes to ensure that all filings meet the stringent requirements for transparency and disclosure. The investing public deserves assurances that the SEC will uphold its mission to protect investors and maintain the integrity of the securities markets.

In closing, I anticipate your prompt attention to this matter and a comprehensive response that addresses these concerns. The credibility and effectiveness of the SEC are of paramount importance, and immediate action must be taken to restore faith in the regulatory framework designed to protect us all.

Sincerely,

(b)(6)

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I'm very concerned about what Mr Trump will do when his site goes public. He wants to pull out his shares and leave the rest of the investors with much less then they would have. Mr Trump should wait the required 6 months just like anyone else would have to do.

Thank you for your concern,

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good day.

I understand that nowhere in D Trump's SPAC does he disclose items (p.132) that all potential shareholders have the right to see: These items include but are not limited to: his documented statements of an inability to fund the current, significant judgements against him; he has suits against him by the companies he wants to merge with AND he is an adjudicated RAPIST.

Thank you for your time.

## Description:

As a concerned citizen, can you tell me how the IPO of Truth Social is not a transfer of wealth from poor unsuspecting non-sophisticated individual-investors into the already wealthy? Not only does Truth Social lose money and subscriptions each month, The CEO, Mr. Trump, has been determined to be a persistent fraudster under NY Business law. His CFO went to jail for fraud, his general counsel has participated in fraud, his former auditors and accountants have fired Trump Org as their client after finding 10 years of documents from Trump cannot be trusted. It looks like after the NY courts determined Trump had committed a lifetime of fraud, the SEC did not reevaluate their stance on this SPAC IPO. I would think a CEO of a declining business who had been determined to be a serial business cheat would raise concerns of an IPO for this same individual's company. If I have sent to the wrong email address, can you kindly let me know who I raise these very serious concerns to. thank you. Thank you in advance for you reply.

## Security Information

Name: Trump Media and Technology

Symbol: DJT

Type: "Prime Bank" securities

## Description:

On the morning of 26 March 2024, I was watching a security traded on the NYSE: DJT. Knowing from Pre-Market numbers that this stock was going up in value very quickly, I attempted to use my online account with Charles Schwab to place a Limit order to sell all of my (b)(6) shares of this stock at approximately \$75.50 per share at about 0934 EDT. However, their "Snap Ticket" system wouldn't allow me to place a Limit order at only about \$75.50 without acknowledging a warning, as the value of DJT had soared to approximately \$15,994 per share. The Schwab Snap Ticket system knew I was trying to sell DJT for far too low even though I attempted to place a Limit order twice. My friend (b)(6) saw this too on his Schwab account, as we were on the phone watching the value of this stock. (b)(6) and I have watched this stock for about 3.5 years. (b)(6) took pictures of the value per share of DJT at \$15,989.33 per share and \$15,994.31 per share in Schwab's system with his cell phone. I have a copy of all of those pictures.

I navigated away from the \$75.50 Snap Ticket and I then went back to the Summary page of my Schwab account and saw that the total value of my Schwab account had very rapidly increased to about \$5,200,000 USD. (b)(6) was watching all of this happen on my computer screen and listening to my phone conversation with (b)(6) saw our account value had gone up to about \$5.2 Million. She screamed at me at the top of her voice: "Sell it all RIGHT NOW!!!!!!"

I then very quickly went to another Schwab Snap Ticket to place a Market order to sell all of my DJT shares. I selected "Sell All" and changed the dropdown of Order Type to "Market", clicked "Review", and then on the next screen of the Snap Ticket clicked "Place Order". When "Place Order" is clicked, this normally executes the sale of a given stock or security within 1 second (at most) on the Schwab website and creates an entry in History with all the details of a transaction, sends an email to the email address associated with the account, and sends a push notification to the mobile device I use to do some trading using Schwab's mobile app. But none of these things happened.

Thinking I had just made about \$5.19 Million, I immediately checked History, but nothing new was there. I refreshed History multiple times, but the sale of DJT for about \$5.19M still didn't appear. About 2 full minutes after I had clicked "Place Order", a sell entry in History came up for DJT, but it was a sale for only \$68 per share.

After waiting on the phone for over an hour on hold to speak to Charles Schwab's Customer Service about this problem, I used their customer service online chat feature to speak to a representative who was in their Denver office. This rep claimed that their system had experienced a "quoting error", and that I could file a dispute on the sale of DJT, but she claimed this sale of DJT was a valid Market Sell order.

I would not have sold this stock at only \$68 as even if there was a quoting error (I do not believe there was a quoting error). The value of the stock went up to about \$77.67 only a few minutes later. If the sale of my (b)(6) shares at \$15,994 each wasn't valid (which I believe it was), because of incorrect order execution I lost out on another \$3,142 of potential monies. The Schwab chat rep told me that it would take about 20 minutes to fill out a transaction dispute form, but there was no guarantee that it would be approved, and she couldn't tell me how I'd get my shares back if it was approved. I wanted to know if I'd get all the shares back at the price I paid for each one (multiple transactions over the last 3+ years), or if it would be market value. She did not have an answer and kept asking me how I wanted to proceed. I eventually didn't file a dispute, as I needed time to think and I lacked details of how the dispute process worked because the Schwab rep wouldn't give them to me. I should have saved a transcript of the chat, but I was so exceedingly devastated by the fact that I wasn't actually a multi-millionaire because of Schwab's website messing up that I simply closed the customer service chat box.

Bottom line, the various computer systems of Charles Schwab experienced a multitude of very major and egregious errors on the morning of 26 March 2024, and cheated (b)(6) and I out of approximately \$5,176,000 USD.

How can Charles Schwab's computer systems make this big of an error? A difference in quoted stock value of about \$15,926 per share by Schwab's computers is a mistake of such extreme magnitude that I don't have adequate words to describe it.

## Description:

It's more than a probability that the Truth Social IPA is just another con propagated by serial conman Donald Trump. How could a social media company that was LOSING money suddenly become so valuable? The answer is stock manipulation. Arrange to have trump allies & other money sources (PACS?) supply the cash for individuals to purchase the stock in volume, in order to drive up the price artificially, thereby suckering other people to join in. Once the stock has hit it's fake high, the insiders will clear out & take all the money with them. I believe that the SEC should immediately investigate this "miraculous" IPA for insider trading & manipulation.

## Description:

The Ipo of DJT hit the stock exchange March 26th

2024. I have seen that just before opening bell the stock will tank down \$10 bucks a share each morning already. This is being done on purpose and if anything it should have gone up instead of being tanked down. I also believe that the SEC is allowing CIA - DIA - NSA to operate fake AI driven accounts to manipulate the stock price and hold them at a certain average for long periods of time with no one to make any gains. This is involving huge Supercomputer systems hiding deep underground that do this Illegal activity.

## Description:

The Market Makers in DJT are manipulating the OPTIONS prices. I am a leading expert in OPTION FRAUD and a former member of the CBOE, CBOT and CME. I know what is going on.

DJT has a 700% short to borrow stock.

So the market makers are manipulating the options.

If a stock goes up the PUT option should go down. Instead the Citadels, et al, are raising the prices.

If a stock goes down the CALL options should go down. Instead the market makers show higher prices.

A spread that would max out at \$5.00 is quoted: \$.50 bid to \$6.00 offer. I am bidding 50 cent debit and not getting filled.

Yet they are bidding a credit. If I try to sell the \$5 spread for \$5.10 when they are offering at \$6.00 I am denied the right by the broker I deal with. If I raise a bid they bid over me. If I then try to lower an offer the broker tells me I cannot both bid and offer. But the market maker can.

Why is this being done? To force the public to take off spreads or positions that might show a loss when in fact there is no loss. But the broker can demand the client to close the position. If the Citadel shows \$1 bid and \$4 offer then the customer sells at \$1 yet has to buy at \$4. Although the conversion of the option to the stock might be a value of \$2.50.

## Description:

Hi,

My name is (b)(6) and as an individual investor I own (b)(6) shares of "DJT" I have been witnessing an ongoing daily manipulation, price suppression and illegal naked shorting, and these crooks never having to account and cover their short positions every single day. Since DJT has been a hard to borrow security with very few shares available to short these crooks have an endless stream of fake synthetic shares every day in large amounts, the question is how are they getting these shares and never having to account for them? Numerous brokerages and dealers are loaning these fake shares out to collect high interest rates for profit. Fake synthetic shares do not exist in reality so therefore they should not be used for shorting a stock. Something needs to be done to stop this theft of good investors who are investing in a fair and just market. Thus whole system is crooked and rigged for their benefit. No one should be able to manipulate any security to their own personal benefit. I don't mind investing as long as it's a fair market without constant manipulation. The SSR rule is supposed to be enforced, Friday April 5 they manipulated the price and dropped it 12%, on Monday April 8 they dropped it again 10%, why isn't the SSR rule enforced? Shorting is supposed to be restricted for one day! DJT will be on the threshold list for 13 days thru d Friday April 12, now these short sellers must close out their failures to deliver by purchasing the shares. I am getting very tired and sick of what they get away with by manipulating the security 24hrs a day, enough is enough. There should be a temporary ban of shorting on DJT for an investigation into the criminal activity. Also, dark pools need to be banned, as part of their manipulation they buy shares in the dark which doesn't move the price in the lit exchange, so the crooks strategy is to sell in the lit exchange to drop the price. DJT price has dropped \$30 in almost 2 weeks. There should be Green Day's in between unless the price is constantly manipulated. If something isn't done soon I will be filing numerous lawsuits pertaining to the illegal activity and theft of ones investment. It is might God given right to invest and believe in a company and help support it without the interference of illegal activity for one's own benefit. Hedge funds, institutions, brokerages need to abide by the rules and regulations of the Sec. Shorting needs to be banned immediately!

Sincerely,

(b)(6)

Subject: Concerned Citizen re Truth Social

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

This is not a compliant filing. I am just asking that the SEC please ensure all the activity around the Truth Social stock is legal and follows the rules. This is just an observation, but the two attached news articles point to real problems that the SEC is responsible for in ensuring safe investment. I would have this concern with any candidate in this position.

1. Conflict of interest - is it a conflict of interest to have a member of Congress, who is openly supporting a presidential candidate, investing in his companies stock, making news about it, all the while campaigning and the company main purpose is the candidates campaign media source?? Especially since the congress member has made statements about being the candidates VP. This seems to reek of conflict and danger to our investing and a danger to our country as the congress member interests are tied to getting the candidate elected and making a lot of money off the stock of the candidate.

2. It seems almost beyond belief that a presidential candidate is out pushing his companies stock while campaigning. Especially when the companies purpose is to be used by the candidate as a media campaign tactic. The voters who support the campaign are being enticed to invest in his stock giving them a reason to ensure the stock unnaturally goes up and he gets elected because it helps his stock. He has billions of dollars at stake and the whole thing is ripe for fraud.

Please send a statement out to investors about these concerns as I ask - do the voters buy stock to gain favors from the candidate and the candidate reaps billions off the company and gets votes bought at the same time, this almost has the appearance of new ponze type scheme.

Subject: Formal complaint against Digital World Acquisition Corp / Trump

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern,

Good afternoon, my name (as per my email address) is (b)(6) I am a (b)(6) living in (b)(6) (b)(6) and I would like to file a complaint against Digital World Acquisition Corp / Trump Media Technology for Market Manipulation regarding the IPO yesterday of Truth Social. On Friday, March 22nd, 2024 I happened upon a post shared by "RideTheNews" (1.2 million followers) on their Instagram platform. The post had been shared mere seconds before I saw, and immediately I realized that it was an advertisement posed as a "prediction" for DAWC. In this "post" the platform attempted to pose the question of DAWC was "the next GameStop".

Once I called out the intent of the post in the comments it was soon deleted, and the platform then took to their own subReddit and shared a post where they blamed the deletion on the IG AI algorithm, that comments were being removed due to "bullying". Not only was there no bullying, I was the only one demanding accountability from the platform for attempting to fool their 1.2 MILLION followers. They then shared their Reddit post as their story, and attempted to deflect any responsibility while covering their tracks.

Not only had the news just broke that day stating DAWC was going to acquire TMT, they knew their intent on taking Truth Social public, and attempted to slide in the ad before the story broke that it would have its IPO this week.

Considering that I am simply a citizen, and that I live in (b)(6) it didn't occur to me until yesterday that I could file a complaint, which is why I left a voicemail on the main LA office line yesterday.

I have included screenshots of the IG slides, as well as the Reddit post, their comments, and the later story the platform shared attempting to deflect the situation. I would greatly appreciate someone contacting me regarding this situation, as I am becoming greatly disillusioned with the state of the world, but especially when ethics regarding the Stock Market are involved and fraud occurs, hurting defenseless people.

Thank you for your attention to this matter, I look forward to speaking with the person assigned to this complaint.

We are getting a lot of questions regarding a DWAC TMTG merger on convertible notes and it seems to be originating from legal@truthsocial.com to draw \$10 million from the \$50 million convertible note raise for its immediate use and tap the remainder on completing its deal with DWAC seems very strange deal as in a give away

How you could even consider this merger is beyond me.

As Trump is a person with less than stellar past company performances (Trump University, Trump Foundation) and current indictments too many to name I would appreciate an explanation of your reasoning.

Thank you,

Type: Blank check offerings

## Description:

I believe that the S4 (merger) document and 8-K filings fail to identify key risk factors attributable to Donald Trump and TMTG. In particular recent court cases have resulted in significant financial penalties in excess of \$464 million which are included in the latest 8-K but fail to reveal that Trump has claimed that he lacks the resources to pay the bonds which represents a significant risk. Additionally, Trump has been adjudicated as a rapist which is material but never disclosed in any filing. Most egregiously, the number of shares available in the offering has been increased dramatically since the inception of this offering.

## Description:

Hello I'm an inverter and I am against the merger between Digital World Acquisition, (SPAC) and Trump Media and Technology Group. This merger will hurt my community which is thinking they are investing in a company in good standing and will make profit from the merger (which is not true). Also investigate into trumps abilities that he has outstanding judgments and dept against him along with criminal cases.. allowing this merger to proceed will hurt my community and other community in the country.. inveterate this case and make a good decision and deny this merger and protect our community and money form fraud.. Thank You

Subject: Hidden Disclosures in Trump SPAC Filings

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I hope someone is taking a look at these SPAC FILINGS by Trump Media before more people get fleeced by this man. Sure missing a lot of items that should be disclosed. <https://www.youtube.com/watch?v=AeLLkNi72k>

Best Regards,

There are some shady filings that need to be investigated as well as the elimination of any warnings regarding him being a convicted rapist who owes a half billion dollars in fines. No mention of it anywhere.

Subject: Trump Media SPAC

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Commissioner's of the S.E.C.,

It is with much dismay that I read of the potential merger between the SPAC and Trump Media.

After Donald Trumps recent conviction for fraud and his record of business failures it appears that it is imperative that investors money should be protected and that

the S.E.C. should prevent the merger until a proper investigation is undertaken. It appears that Donald Trump is trying to extract money from the SPAC in order to pay his

finances in his fraud case and recent conviction for liable in relation to his sexual assault conviction.

We will hold the S.E.C. liable if it fails in it's fiduciary duty and to protect investors from losing their money.

Yours sincerely,

(b)(6)

Subject: Trump SPAC Filing

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

The SPAC filing that I have read over does not include the fact that Donald J. Trump is an adjudicated rapist and cannot pay the Bond in the E Jean Carroll \$83.3 million dollar Judgement along with the fact that he does not have the funds to pay the NY AG Civil Fraud Judgement of \$464 million dollars (including interest) are not included in the Filings. The original SPAC founder Patrick Orlando is suing Trump now along with the company founders of TMTG. This entire merger is a sham which will leave shareholders losing millions considering that in the February 26th filing where Trump Media claims they are authorizing the sale of One Billion Shares which is eight times outstanding his worth. This seems extremely diluted all going to the "FOUNDER" Donald J Trump, when in effect the original founder of Trump Media and the people who brought the idea to start the company are being screwed! Please take a look at what should also be included in the disclosure! All of the information involving his lawsuit Judgements and the fact that he is unable to pay and will be forced to sell property to pay the Judgements should be included in the disclosure.

Thank you for your time

## Description:

I, as a citizen, wish to ask the SEC to pay much attention to the Trump Digital world proposal. In as much as he has a history of numerous bankruptcies, it suggests that any offering is subject to much scrutiny.

SEC: HO (b)(6) Voicemail

HO (b)(6) voicemail

(b)(6)

Good afternoon. My name is (b)(6) I live in (b)(6) Sir, I was a (b)(6) I'm calling about this Trump SPAC deal that is going on. I would like to know who to call to try and embolden them to do something about this scam. You've got a company losing money, and he's going to get \$4 billion or \$3 billion for what? This is obviously another big gift by Donald Trump.

If you guys don't stop it, you're going to be just like you were with Bernie Madoff. You had more than enough data to take him out 10 years before he [unintelligible] people out of \$60 billion. Now you've got a former president who's a criminal and just a horrible life form. He isn't even human. You're going to allow him to get \$3 billion going forward on a deal that's worthless. I have a problem with that. I want a call back.

I'm a taxpayer, and (b)(6) I want to know what I can do to help bring light to this matter and stop it. My number is (b)(6) As you can tell, I am furious. I'm furious at you guys for letting this crap go on. It's time to stop.

I'm calling Elizabeth Warren today and suggesting that she take action to do the same and to monitor your activities on this stupid SPAC that he's going to walk away with. I want an answer. Thank you.

SEC: HO (b)(6) Voice Message

HO (b)(6) Voice Message

Female Speaker:

Hi. So, I'm calling with regards to Donald Trump through social and the messaging he's putting out at the moment. I've been watching some Meidas Touch posts by Ben Meiselas. He put one out last week and one out today. The Post today has a headline on it, on his YouTube post. If you look for Ben Meiselas in his contributors, if you can't see it called, and the headline is "You Can't Do That, Donald." So he's questioning the legality of the posting where Trump is putting out, essentially, spooking, attempting to spook up the stock with false information to encourage people to buy the stock while the price is falling. Suggesting that's not legal behavior.

So you guys might want to investigate that, perhaps. And if it is illegal, like everything else he seems to do, everything he does is below standard and with the belief that the law doesn't apply to him or he actually has no idea what the rules are and makes them up and thinks everybody in society is going to adjust to his rules. So you might want to do something about that so a whole bunch of people don't get burnt by another one of his failed businesses. Thank you.
