

US Corporate FRN 500MM Liquid Index

The Bloomberg Barclays US Corporate FRN 500MM Liquid Bond Index is a subset of the US Floating-Rate Note (FRN) Index, and measures the performance of USD denominated, investment-grade, corporate floating-rate notes with a minimum USD500mn amount outstanding. To be included in the index, the notes must also have been issued within the last 2.5 years and with at least 2.5 years original maturity. Issuer exposure is constrained to 5% of the index, and excess market value is redistributed on a pro rata basis. The index was incepted on February 8, 2018, with history backfilled to January 2013.

Sector Composition (MV%) - as of January 31, 2018

Quality Composition (MV%) - as of January 31, 2018

Rules for Inclusion

Amount Outstanding	USD500mn minimum par amount outstanding.
Sector	Corporate (industrial, utility and financial institutions) issuers only.
Quality	<p>Securities must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality:</p> <ul style="list-style-type: none"> • Expected ratings at issuance may be used to ensure timely index inclusion or to classify split-rated issuers properly. • Unrated securities may use an issuer rating for index classification purposes if available. Unrated subordinated securities are included if a subordinated issuer rating is available.
Maturity	<ul style="list-style-type: none"> • Minimum of 1 month to final maturity. • Must have an original maturity of at least 2.5 years. • Must be issued within the last 2.5 years.
Seniority of Debt	Senior and subordinated issues are included.
Taxability	Only fully taxable issues are eligible.
Coupon	<ul style="list-style-type: none"> • 3-month LIBOR-based fixed spread securities.

Rules for Inclusion

	<ul style="list-style-type: none"> • Step-up coupons. 		
Currency	Principal and coupons must be denominated in USD.		
Market of Issue	<ul style="list-style-type: none"> • SEC-registered securities, bonds exempt from registration at time of issuance, or SEC Rule 144A securities with or without registration rights are index eligible. A security with both SEC Regulation S (Reg-S) and SEC Rule 144A tranches is treated as one security in par value; to prevent double-counting, the 144A tranche is used to represent the issue and comprises the combined amount outstanding of the 144A and Reg-S tranches. • Issues with global market of issue are included. 		
Security Types	<table border="0"> <tr> <td style="vertical-align: top;"> Included <ul style="list-style-type: none"> • FRNs with coupon step-ups • 3-month LIBOR-based fixed-spread securities • Corporate entities and funding agreements • Bullet and callable structures </td> <td style="vertical-align: top;"> Excluded <ul style="list-style-type: none"> • Sinking bonds • Fixed-rate bonds • Fixed-rate and fixed-to-floating securities; securities not floating rate at issuance • Bonds with equity-type features (e.g., warrants, convertibles, contingent capital securities) • Inflation-linked bonds • Fixed-rate perpetuals • Securitized bonds (MBS, ABS, CMBS, covered) • Yankee CDs • FDIC-guaranteed bank debt • Illiquid securities with no available market quotes </td> </tr> </table>	Included <ul style="list-style-type: none"> • FRNs with coupon step-ups • 3-month LIBOR-based fixed-spread securities • Corporate entities and funding agreements • Bullet and callable structures 	Excluded <ul style="list-style-type: none"> • Sinking bonds • Fixed-rate bonds • Fixed-rate and fixed-to-floating securities; securities not floating rate at issuance • Bonds with equity-type features (e.g., warrants, convertibles, contingent capital securities) • Inflation-linked bonds • Fixed-rate perpetuals • Securitized bonds (MBS, ABS, CMBS, covered) • Yankee CDs • FDIC-guaranteed bank debt • Illiquid securities with no available market quotes

Rebalancing Rules

Issuer Capping Methodology	Issuers that exceed 5% of the market value of an uncapped US Corporate FRN 500MM Liquid index are limited at 5%. The excess market value over the 5% cap is redistributed on a pro rata basis to all other issuers' bonds in the index that are under the 5% cap. The process is repeated until no issuer exceeds the 5% limit. For example, an issuer that represents 6% of the uncapped US Corporate FRN 500MM Liquid Index will have 1% of the index's market value redistributed to each bond from all issuers under the 5% cap on a pro rata basis. The 5% issuer cap is applied each month as the index is rebalanced.
Frequency	For each index, Bloomberg maintains two universes of securities: the Returns (Backward) and the Projected (Forward) Universes. The composition of the Returns Universe is rebalanced at each month-end and represents the fixed set of bonds on which index returns are calculated. The Projected Universe is a forward-looking projection that changes daily to reflect issues dropping out of and entering the index but is not used for return calculations. On the last business day of the month (the rebalancing date), the composition of the latest Projected Universe becomes the Returns Universe for the following month.
Index Changes	During the month, indicative changes to securities (credit rating change, sector reclassification, amount outstanding changes, corporate actions, and ticker changes) are reflected daily in the Projected and Returns Universe of the index. These changes may cause bonds to enter or fall out of the Projected Universe of the index on a daily basis, but will affect the composition of the Returns Universe at month-end only, when the index is next rebalanced.
Reinvestment of Cash Flows	Intra-month cash flows from interest and principal payments contribute to monthly index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the Returns Universe for the following month so that index results over two or more months reflect monthly compounding.
New Issues	Qualifying securities issued, but not necessarily settled on or before the month-end rebalancing date, qualify for inclusion in the following month's index if the required security reference information and pricing are readily available.

Pricing and Related Issues

Sources & Frequency	All index-eligible bonds are priced on a daily basis by Bloomberg's evaluated pricing service, BVAL.
Pricing Quotes	Prices are quoted as a percentage of par.
Timing	<ul style="list-style-type: none"> • 3pm (New York time) each day. • On early market closes, prices are taken as of 1pm (New York time) unless otherwise noted. • If the last business day of the month is a US holiday, prices from the previous day are used.
Bid or Offer Side	Bonds in the index are priced on the bid side.
Settlement Assumptions	<ul style="list-style-type: none"> • T+1 calendar day settlement basis. • At month-end, settlement is assumed to be the first calendar day of the following month, even if the last business day is not the last day of the month, to allow for one full month of accrued interest to be calculated.
Verification	Daily price moves for each security are analyzed by the index pricing team to identify outliers. Index users may also challenge price levels, which are then reviewed and updated as needed.
Calendar	The US Corporate FRN 500MM Liquid Index follows the US bond market holiday schedule.

Accessing Index Data

Bloomberg Professional® service	<p>Bloomberg benchmarks are the global standard for capital markets investors.</p> <ul style="list-style-type: none"> • INDEX<Go> – The Bloomberg Indices landing page is a dashboard for index-related information on the terminal. Find daily and monthly index returns for key indices from each index family as well as index publications including methodologies, factsheets, monthly reports, updates and alerts. • IN<Go> – The Bloomberg Index Browser displays the latest performance results and statistics for the indices as well as history. IN presents the indices that make up Bloomberg's global, multi-asset class index families into a hierarchical view, facilitating navigation and comparisons. The "My Indices" tab allows a user to focus on a set of favorite indices. • PORT<Go> – Bloomberg's Portfolio & Risk Analytics solution includes tools to analyze the risk, return, and current structure of indices. Analyze the performance of a portfolio versus a benchmark or use models for performance attribution, tracking error analysis, value-at-risk, scenario analysis, and optimization. • DES<Go> – The index description page provides transparency into an individual index including membership information, aggregated characteristics and returns, and historical performance.
Bloomberg Indices Website (www.bloombergindices.com)	<p>The index website makes available limited index information including:</p> <ul style="list-style-type: none"> • Index methodology and factsheets • Current performance numbers for select indices
Data Distribution	<p>Index subscribers may choose to receive index data in files. Files may include:</p> <ul style="list-style-type: none"> • Index level and/or constituent level returns and characteristics for any indices • Automatic delivery of files via email or SFTP following the completion of the index production process after market close • Clients may receive standard files or may customize file contents • Index data is also available via authorized redistributors
Index Ticker	I33629US
