White House Wanted USS John McCain 'Out of Sight' During Trump Japan Visit

U.S. military officials worked to ensure President Trump would not see the warship that bears the name of the late senator, a frequent target of the president's ire

By Rebecca Ballhaus and Gordon Lubold
May 29, 2019 7:44 p.m. ET
https://www.wsj.com/articles/white-house-wanted-uss-john-mccain-out-of-sight-during-trump-japan-visit-11559173470?mod=hp_lista_pos2

The White House wanted the U.S. Navy to move "out of sight" a warship named for the late Sen. John McCain, a war hero who became a frequent target of President Trump's ire, ahead of the president's visit to Japan last week, according to an email reviewed by The Wall Street Journal.

In a May 15 email to U.S. Navy and Air Force officials, a U.S. Indo-Pacific Command official outlined plans for the president's arrival that he said had resulted from conversations between the White House Military Office and the Seventh Fleet of the U.S. Navy. In addition to instructions for the proper landing areas for helicopters and preparation for the USS Wasp—where the president was scheduled to speak—the official issued a third directive: "USS John McCain needs to be out of sight."

"Please confirm #3 will be satisfied," the official wrote.

When a Navy commander expressed surprise about the directive for the USS John McCain, the U.S. Indo-Pacific Command official replied: “First I heard of it as well.” He said he would work with the White House Military Office to obtain more information about the order.

Acting Defense Secretary Pat Shanahan was aware of the concern about the presence of the USS John McCain in Japan and approved measures to ensure it didn’t interfere with the president’s visit, a U.S. official said.

There were discussions within the U.S. military over the past week about how to handle the warship, another U.S. official said. The ship is being repaired after a 2017 collision, and any ship undergoing such repair or maintenance would be difficult to move, officials said. A tarp was hung over the ship’s name ahead of the president’s trip, according to photos reviewed by the Journal, and sailors were directed to remove any coverings from the ship that bore its name. After the tarp was taken down, a barge was moved closer to the ship, obscuring its name. Sailors on the ship, who typically wear caps bearing its name, were given the day off during Mr. Trump’s visit, people familiar with the matter said.

Mr. Trump arrived in Japan on Saturday and on Tuesday—though still Monday in the U.S.—delivered Memorial Day remarks to troops aboard the USS Wasp, which is stationed along with the USS John McCain at Yokosuka Naval Base, south of Tokyo. Speaking to around 800 military men and women—some of whom wore “Make Aircrew Great Again” patches with a likeness of the president on their jumpsuits—Mr. Trump said he was joined by sailors from six other ships. He made no mention of the USS John McCain.

Before visiting the USS Wasp, Mr. Trump visited the helicopter carrier JS Kaga, from which the USS John McCain would have been visible.

The White House declined to answer questions about the reason for the directive or where it originated. The White House Military Office provides support for presidential travel, among other matters.

Mr. Trump has repeatedly attacked Mr. McCain, both before and since the Arizonan died in August from a brain tumor at 81 years old. In the first years of the Trump administration, Mr. McCain was one of the few Republican senators willing to publicly challenge the president, including casting a critical vote in 2017 that blocked the GOP effort to repeal the Affordable Care Act. That vote—which Mr. McCain signaled with a thumbs-down gesture—was a source of immense aggravation for the president, who has often mimicked the hand motion and who called the vote “disgraceful” in April.

In March, Mr. Trump complained that he hadn’t been thanked for giving Mr. McCain “the kind of funeral that he wanted.” Speaking to workers at an Ohio factory, he said, “I didn’t get a thank you. That’s OK.” He also belittled Mr. McCain’s academic performance in college and criticized the late senator for turning over a dossier of unverified allegations about his connections to Russia to the Federal Bureau of Investigation.

During the 2016 campaign, Mr. Trump disparaged Mr. McCain's military service in Vietnam, saying he was "not a war hero" and that "I like people who weren't captured."

Mr. McCain was a prisoner of war for 5½ years in Vietnam, where he endured beatings and solitary confinement, while refusing to accept Vietnamese offers of early release on the grounds that it would undermine the morale of others who lacked Mr. McCain's connections. Mr. McCain was the son and grandson of admirals, and his father had been promoted to the position of commander of all U.S. forces in the Pacific theater.

In July 2018, a month before Mr. McCain's death, Secretary of the Navy Richard Spencer formally added Mr. McCain as a namesake of the USS John McCain, which had been named for his father and grandfather after it launched in 1994. Mr. McCain said at the time that he was "deeply honored."

The USS John McCain collided with a merchant vessel in August 2017, killing 10 sailors and tearing a hole in the left rear side of the destroyer. Mr. Trump, asked about the collision at the time, told reporters: "That's too bad." He later tweeted that his thoughts and prayers were with the sailors aboard the ship.

Friday, May 31, 2019

USS John S. McCain remains center stage

Anyone who did not want attention on USS John S. McCain during the President's visit is now getting the [exact opposite of that](#). JSM and reports of direction from the White House to keep her out of sight drove intense news interest yesterday, and there are still questions about exactly what happened.

[The President himself weighed in](#), calling the WH official who gave the direction "well-meaning." The Acting SECDEF said he was not aware of the direction and [initiated an investigation](#) into what happened. And [legislators began asking questions](#) about the incident, which [promises to be a topic](#) during upcoming confirmation hearings for SECDEF.

Eyes on Shangri-La

As the Shangri-La Dialogue kicks off today in Singapore, the focus will be on the friction between China and the US, especially at sea. [This post from CNN previews](#) some of the trickier challenges that are on the table.

Meanwhile, [China launched a rhetorical warning shot](#) about the U.S. support for Taiwan, and a PLA-connected pundit [wrote in the Financial Times](#) that both

countries navies had an important role in decreasing tensions.

Expect more today from Asia on the friction and security environment in the Indo Pacific.

Judge releases Gallagher prior to trial

Accused SEAL Eddie Gallagher, who had been in custody awaiting the start of his court martial for murder next month, was released by the judge. [LA Times reports](#), "The unexpected move drew gasps from those at a hearing in a San Diego courtroom in which lawyers for Special Operations Chief Edward Gallagher [sought to get the case dismissed](#) for prosecutorial misconduct."

The defense team withdrew their motion to have the judge removed after the judge said he had not given prosecutors the green light to use an email tracking tool.

The court martial is scheduled to begin June 10.

Navy core values

Navy Times [reported on CNO's announcement](#) that the Navy will be reforming the PRT, adding rowing and planking and ditching the sit-up. This follows a similar move by the USMC to the plank as a better assessment of core (not corps) strength.

More tracks on the scope

- Dunford: Leaders mull first NATO strategy in decades ([Breaking Defense](#)).
- Marines, sailors and Coasties play catch-up in Arctic warfare ([Military Times](#)).

- Integrating America's newest fleet to adapt to the challenges in the North Atlantic and Arctic ([Defense News](#)).
- Inhofe: Any Ford delay would present 'a dangerous readiness gap' ([Breaking Defense](#))

Keeping a weather eye

- Shangri-La Dialogue kicks off in Singapore. SECDEF to speak, SECNAV attending.
- SECSTATE Pompeo heads to Europe for meetings in Berlin, Switzerland, The Hague and London.

Sir – I don't have any SA on the specific e-mail referenced in the story. But in talking to the Yokosuka PAO, Monday, he mentioned that they had in fact taken great pains to "hide" John S. McCain because of sensitivities related to POTUS and Sen McCain's relationship. It wasn't clear to me at the time whether it was a specific direction from the White House or just someone's good idea at Yokosuka. Seems now that it was direction from the WH, if this reporting is to be believed.

(b) (6),

In response to 1. and 3. in your email below:

1. We have CPF to C7F FOS RFI out now with suspense of 1800W today for full detailed risk assessment of WSP and RRN POTUS support, understanding WSP needs to be pier side morning of 24th (latest) and that RRN is the primary resource if WSP is unable.
2. This is the first I have seen about the McCain being out of sight. Recommend this in FRAGO when you issue the WSP/RRN timeline update.

In receipt of your latest VTC invite for tomorrow afternoon. Hopefully WHMO will be on the line.
Thanks,

Capt (b) (6) /CDR (b) (6),

Please see below excerpt from discussions between WHMO and C7F. Need all supporting units to understand the requirement for rehearsals. Hopefully the WASP can get there early enough. Also, please let me know the latest on the deck landing requirement. There is a lot of stray voltage out there right now about what is actually required. There is no expectation for the CH-47s to land on an LHD. My understanding is the HH-60 deck landing is somehow dependent on what the HMX-1 white-tops can do on the KAGA. Let me know when this is clarified with the WHMO team in Japan. Also, please confirm #3 will be satisfied.

-
1. WASP needs to be in port NLT 24 May (22 May desired) for HMX rehearsal. If not, we need to keep the Reagan in port for the rehearsal and event.
 2. Need to use a landing area closer to the JS Kaga for the press heavy lift helo so they can get in place. Staff helicopter can land in the ball field but press helo needs to be closer
 3. USS John McCain needs to be out of sight.

(b) (6),

In response to 1. and 3. in your email below:

1. We have CPF to C7F FOS RFI out now with suspense of 1800W today for full detailed risk assessment of WSP and RRN POTUS support, understanding WSP needs to be pier side morning of 24th (latest) and that RRN is the primary resource if WSP is unable.
2. This is the first I have seen about the McCain being out of sight. Recommend this in FRAGO when you issue the WSP/RRN timeline update.

In receipt of your latest VTC invite for tomorrow afternoon. Hopefully WHMO will be on the line. Thanks,

Vr, (b) (6)

Subject: FW: 7th Fleet/RDML LeClair

Capt (b) (6),

Please see below excerpt from discussions between WHMO and C7F. Need all supporting units to understand the requirement for rehearsals. Hopefully the WASP can get there early enough. Also, please let me know the latest on the deck landing requirement. There is a lot of stray voltage out there right now about what is actually required. There is no expectation for the CH-47s to land on an LHD. My understanding is the HH-60 deck landing is somehow dependent on what the HMX-1 white-tops can do on the KAGA. Let me know when this is clarified with the WHMO team in Japan. Also, please confirm #3 will be satisfied.

1. WASP needs to be in port NLT 24 May (22 May desired) for HMX rehearsal. If not, we need to keep the Reagan in port for the rehearsal and event.
2. Need to use a landing area closer to the JS Kaga for the press heavy lift helo so they can get in place. Staff helicopter can land in the ball field but press helo needs to be closer
3. USS John McCain needs to be out of sight.

V/r,

Boss,

Pulled the string on the forensics for this

BLUF: (b) (5) (b) (6) (b) (5) (b) (5) " This direction was passed to WHMO (b) (6) USAF who in turn provided this guidance to C7F CoS; (b) (6) then provided this direction to CNFJ as the main Naval planning effort for the JTF (USFJ) As backup, RDML Davids (D/WHMO) also passed the same direction via email to RDML LeClair (D/C7F) emphasizing the importance of making sure this happens (I have this email traffic on SIPR) Additionally, PACOM J3 JOC passed the same guidance to C7F and CC'd our guys (b) (6) and (b) (6) See email string below the cutline Finally, DESRON Commander (B6) took additional steps by hanging the DESRON brow banner and designating JSM as the command ship during the DV-1 visit and this was NOT directed by C7F

Standing by to discuss

V/R, (b) (6)

COM -

We received an RFI re the tasking 'to keep MCCAIN out of sight' during the upcoming DV1 visit. A rough reconstructed sequence of events follows:

- * O/A 15 May: WHMO requested (SIPR traffic) to ensure JSM was not visible from the WSP.
 - * This WHMO request was later (o/a 16 May) pushed out by INDOPACOM planners to JTF POTUS and component commanders. ALCON were tracking this as a requirement though it was not listed in the IPC PLANORD.
 - * Based on the tasking above, organizations under my OPCON leaned forward to ensure JSM name was not visible from WSP. This includes:
 - Designating JSM as the CDS-15 Flagship. CDS-15 banner is now on the JSM brow (vice a JSM banner).
 - Placing a paint scaffolding at the stern of the ship. This partially obscures the ship's name.
 - JSM's 4 day Memorial Day weekend runs from Saturday through Tuesday (the day of DV1 visit)
- (Note: All you see from WSP wrt JSM is JSM's bow and the hull name 56)

From my experience, there is a high level of activity, BPT and direction iso JTF POTUS. Everyone is leaning forward to solve issues, not unusual for staffs to take action on email tasking and not unusual for WHMO to task echelon commands below the JS/IPC level.

I just walked JSM and talked with the CO. I also walked WSP and viewed the waterfront from WSP flight deck. I am comfortable with the actions that have been taken at JSM.

Recommend no further actions wrt DV1 visit and JSM and this includes 'undoing' anything that has been done (brow banner, paint scaffolding).

BT

I also walked through with the JSM CO and the Bath Iron Works MRG engineer the corrective actions for the port shaft mis-alignment. They are executing a plan that does not require moving bearing foundation work (significant effort). This plan simply 'shims' the bearings and shaft to a point where everything is aligned. This will work assuming the 'shimming' won't result in excessive force on the system. In essence, they'll 'shim' everything in alignment and then test the new forces applied. If within tolerances, we're good. If too much force then they'll need to move some foundations.

Subject: RE: JSM

WHMO email is on the high side.

UNCLAS planner email attached - this followed later from INDOPACOM J3 lead planners in JTF POTUS to LCDR (b) (6) etc. - our Rep. WHMO reached out to INDOPACOM who sent the request in planning channels and would not put it in writing.

Sequence of Events from my seat:

- * WHMO requested high side to me. I passed to Region (Henry) for consideration. This was briefed to ADM Aquilino at the CUB by RDML Fenton - COM acknowledged the sensitivity. Task was to ensure JSM was not visible from the WSP (and name).
- * This request was later followed through by INDOPACOM planners to JTF POTUS region and component commanders. All were tracking this as a requirement per RDML Fenton's brief at CUB and the WHMO direction.
- * I informed Cos (b) (6) BPT receive this type of direction from Region and planners.
- * Intent was to survey from WSP and then act accordingly to accomplish intent as I understood it from Region and our planning team.
- * PACFLT and INDOPACOM decided not to put this in writing (for these very reasons probably) but passed via operations and planning teams to comply with WH intent.
- * Per my discussion with Duffy and CO this morning, they simply referenced hearing first about this from CTF 70 and C7F Chiefs of Staff and relayed that to OLA. No orders were given to have any brow banners or specific tactical actions taken.
- * However, from CO view, given the general 'make sure the ship and name are not visible' I can see where he and the CDRE would be judicious in their effort to comply with White House intent or even aggressive to do so.

Subject: JSM

Admiral

I spoke with chain of command (70 CoS, DESRON) and JSM CO this morning.

DESRON and ship leaned forward and took some extra precautions (designating JSM as DESRON 15 flag ship, hang DESRON brow banner) at their own initiative.

JSM CO (former Sen McCain legislative fellow) spoke with RADM Loeblein when OLA heard about the WH political request that came from WHMO and through IPC planners via JTF POTUS. (Loeblein called him).

Think RADM Loeblein is trying to piece together the picture, don't sense there is pointing of fingers - this type of visit comes through COCOM channels and not OLA, so OLA is not squarely in the loop.

(b) (6) has the email traffic from WHMO principals and the email trail from INDOPACOM J3 POTUS planners giving the direction.

I explained to (b) (6) that the only requirement was not visible from WSP, and that since WSP arrived yesterday Region had verified.

(B6)

The best way to approach this may be to not have JSM participate in the Hangar bay event, CTF 70 could choose to leave them off the planning. As far as staggering the mass of humanity that will be in the Hangar bay we can certainly arrange whatever the preference is. I am still trying to get an advance party visit sometime this weekend to sort out these details with WH Advon.

CAPT (b) (6) and CAPT (b) (6)

I know you are tracking the JSM being "out of sight" request from WH and believe you've mentioned CFAY CMC is putting out the call for waterfront sailors to participate in the DV1 event aboard WASP.

Is it possible to determine the plan to prioritize the proximity of sailors in the hangar bay? WASP sailors in the front, followed by units deploying next? I don't know who would be handling that portion, but figured an arrangement like this would meet WH intent to limit the JSM visibility

during the visit.

Additionally, for the DV-1 grip/grin on the WSP Flight deck, is CNFJ Protocol running the vetting for that portion? I hate to say a JSM SoY can't participate because of the ship he is on, but its trending that direction.

COS (b) (6) just wants to make sure we have a solid plan moving forward on this piece as well as the LZ next to KAGA (which I agree belongs to HMX-1 and WH to determine).

Subject: RE: JSM Sailors for DV1 Speech and Meet/Greet

I am not tracking that a JSM nametag takes you out of the hunt. We will get the ship out of view, but I will await clearer direction before inferring tasks out of the specified task (which is not in any official tasking document).

We need to stop burning the candle at multiple ends wrt the helo plan. HMX-1 and Secret Service are on deck in Japan working the plan. If WHMO has direction for them on the plan, they need to pass it through them. I do not intend to pool up on the 47 at YRD question until the helo planners on deck here say that is the plan.

Please work with CAPT (b) (6) on this to make sure it's all in line.

Task is still vague, but my direction was to have a good plan to meet WH intent on having JSM out of sight while not calling attention to the fact JSM sailors were not allowed to participate.

Very Respectfully,

The best way to approach this may be to not have JSM participate in the Hangar bay event, CTF 70 could choose to leave them off the planning. As far as staggering the mass of humanity that will be in the Hangar bay we can certainly arrange whatever the preference is. I am still trying to get an advance party visit sometime this weekend to sort out these details with WH Advon.

CAPT (b) (6) and CAPT (b) (6)

I know you are tracking the JSM being "out of sight" request from WH and believe you've mentioned CFAY CMC is putting out the call for waterfront sailors to participate in the DV1 event aboard WASP.

Is it possible to determine the plan to prioritize the proximity of sailors in the hangar bay? WASP sailors in the front, followed by units deploying next? I don't know who would be handling that portion, but figured an arrangement like this would meet WH intent to limit the JSM visibility during the visit.

Additionally, for the DV-1 grip/grin on the WSP Flight deck, is CNFJ Protocol running the vetting for that portion? I hate to say a JSM SoY can't participate because of the ship he is on, but its trending that direction.

COS (b) (6) just wants to make sure we have a solid plan moving forward on this piece as well as the LZ next to KAGA (which I agree belongs to HMX-1 and WH to determine).

(b) (6),

In response to 1. and 3. in your email below:

1. We have CPF to C7F FOS RFI out now with suspense of 1800W today for full detailed risk assessment of WSP and RRN POTUS support, understanding WSP needs to be pier side morning of 24th (latest) and that RRN is the primary resource if WSP is unable.

2. This is the first I have seen about the McCain being out of sight. Recommend this in FRAGO when you issue the WSP/RRN timeline update.

In receipt of your latest VTC invite for tomorrow afternoon. Hopefully WHMO will be on the line. Thanks,

Vr, (b) (6)

Capt (b) (6) /CDR (b) (6)

Please see below excerpt from discussions between WHMO and C7F. Need all supporting units to understand the requirement for rehearsals. Hopefully the WSP can get there early enough. Also, please let me know the latest on the deck landing requirement. There is a lot of stray voltage out there right now about what is actually required. There is no expectation for the CH-47s to land on an LHD. My understanding is the HH-60 deck landing is somehow dependent on what the HMX-1 white-tops can do on the KAGA. Let me know when this is clarified with the WHMO team in Japan. Also, please confirm #3 will be satisfied.

1. WASP needs to be in port NLT 24 May (22 May desired) for HMX rehearsal. If not, we need to keep the Reagan in port for the rehearsal and event.
2. Need to use a landing area closer to the JS Kaga for the press heavy lift helo so they can get in place. Staff helicopter can land in the ball field but press helo needs to be closer
3. USS John McCain needs to be out of sight.

Subject: JSM

Admiral

I spoke with chain of command (70 CoS, DESRON) and JSM CO this morning.

DESRON and ship leaned forward and took some extra precautions (designating JSM as DESRON 15 flag ship, hang DESRON brow banner) at their own initiative.

JSM CO (former Sen McCain legislative fellow) spoke with RADM Loeblein when OLA heard about the WH political request that came from WHMO and through IPC planners via JTF POTUS. (Loeblein called him).

Think RADM Loeblein is trying to piece together the picture, don't sense there is pointing of fingers - this type of visit comes through COCOM channels and not OLA, so OLA is not squarely in the loop.

(b) (6) has the email traffic from WHMO principals and the email trail from INDOPACOM J3 POTUS planners giving the direction.

I explained to (b) (6) that the only requirement was not visible from WSP, and that since WSP arrived yesterday Region had verified.

WHMO email is on the high side.

UNCLAS planner email attached - this followed later from INDOPACOM J3 lead planners in JTF POTUS to LCDR (b) (6) etc. - our Rep. WHMO reached out to INDOPACOM who sent the request in planning channels and would not put it in writing.

Sequence of Events from my seat:

- * WHMO requested high side to me. I passed to Region (b) (6) for consideration. This was briefed to ADM Aquilino at the CUB by RDML Fenton - COM acknowledged the sensitivity. Task was to ensure JSM was not visible from the WSP (and name).
- * This request was later followed through by INDOPACOM planners to JTF POTUS region and component commanders. All were tracking this as a requirement per RDML Fenton's brief at CUB and the WHMO direction.
- * I informed Cos (b) (6) BPT receive this type of direction from Region and planners.
- * Intent was to survey from WSP and then act accordingly to accomplish intent as I understood it from Region and our planning team.
- * PACFLT and INDOPACOM decided not to put this in writing (for these very reasons probably) but passed via operations and planning teams to comply with WH intent.
- * Per my discussion with Duffy and CO this morning, they simply referenced hearing first about this from CTF 70 and C7F Chiefs of Staff and relayed that to OLA. No orders were given to have any brow banners or specific tactical actions taken.
- * However, from CO view, given the general 'make sure the ship and name are not visible' I can see where he and the CDRE would be judicious in their effort to comply with White House intent or even aggressive to do so.

Subject: JSM

Admiral

I spoke with chain of command (70 CoS, DESRON) and JSM CO this morning.

DESRON and ship leaned forward and took some extra precautions (designating JSM as DESRON 15 flag ship, hang DESRON brow banner) at their own initiative.

JSM CO (former Sen McCain legislative fellow) spoke with RADM Loeblein when OLA heard about the WH political request that came from WHMO and through IPC planners via JTF POTUS. (Loeblein called him).

Think RADM Loeblein is trying to piece together the picture, don't sense there is pointing of fingers - this type of visit comes through COCOM channels and not OLA, so OLA is not squarely in the loop.

(b) (6) has the email traffic from WHMO principals and the email trail from INDOPACOM J3 POTUS planners giving the direction.

I explained to (b) (6) that the only requirement was not visible from WSP, and that since WSP arrived yesterday Region had verified.

Subject: RE: JSM

WHMO email is on the high side.

UNCLAS planner email attached - this followed later from INDOPACOM J3 lead planners in JTF POTUS to LCDR (b) (6) etc. - our Rep. WHMO reached out to INDOPACOM who sent the request in planning channels and would not put it in writing.

Sequence of Events from my seat:

- * WHMO requested high side to me. I passed to Region (b) (6) for consideration. This was briefed to ADM Aquilino at the CUB by RDML Fenton - COM acknowledged the sensitivity. Task was to ensure JSM was not visible form the WSP (and name).
- * This request was later followed through by INDOPACOM planners to JTF POTUS region and component commanders. All were tracking this as a requirement per RDML Fenton's brief at CUB and the WHMO direction.
- * I informed Cos (b) (6) BPT receive this type of direction from Region and planners.
- * Intent was to survey from WSP and then act accordingly to accomplish intent as I understood it from Region and our planning team.
- * PACFLT and INDOPACOM decided not to put this in writing (for these very reasons probably) but passed via operations and planning teams to comply with WH intent.
- * Per my discussion with Duffy and CO this morning, they simply referenced hearing first about this from CTF 70 and C7F Chiefs of Staff and relayed that to OLA. No orders were given to have any brow banners or specific tactical actions taken.
- * However, from CO view, given the general 'make sure the ship and name are not visible' I can see where he and the CDRE would be judicious in their effort to comply with White House intent or even aggressive to do so.

BWC made it sound like VADM went down to JSM and took his own pictures. I guess (b) (6) (who was BWC) at the time was talking to the JSM OOD and heard the VADM get bonged on. They also eluded to the request going direct from Aquilino to Sawyer.

I don't know if they were messing with me, but they said everyone has the info they need right now.

Very Respectfully,

Subject: FW: DV 1 follow up

Boss,

Pulled the string on the forensics for this.

BLUF: On Wed, 15 May, (b) (5)

(b) (5)
This direction was passed to WHMO ((b) (6)), USAF) who in turn provided this guidance to C7F CoS, (b) (6). (b) (6) then provided this direction to CNFJ as the main Naval planning effort for the JTF (USFJ). As backup, RDML Davids (D/WHMO) also passed the same direction via email to RDML LeClair (D/C7F) emphasizing the importance of making sure this happens (I have this email traffic on SIPR). Additionally, PACOM J3 JOC passed the same guidance to C7F and CC'd our guys ((b) (6)). See email string below the cutline. Finally, DESRON Commander (B6) took additional steps by hanging the DESRON brow banner and designating JSM as the command ship during the DV-1 visit and this was NOT directed by C7F.

Standing by to discuss.

V/R, (b) (6)

In response to 1. and 3. in your email below:

1. We have CPF to C7F FOS RFI out now with suspense of 1800W today for full detailed risk assessment of WSP and RRN POTUS support, understanding WSP needs to be pier side morning of 24th (latest) and that RRN is the primary resource if WSP is unable.
2. This is the first I have seen about the McCain being out of sight. Recommend this in FRAGO when you issue the WSP/RRN timeline update.

In receipt of your latest VTC invite for tomorrow afternoon. Hopefully WHMO will be on the line. Thanks,

Vr, (b) (6)

Subject: FW: 7th Fleet/RDML LeClair

Capt (b) (6) /CDR (b) (6)

Please see below excerpt from discussions between WHMO and C7F. Need all supporting units to understand the requirement for rehearsals. Hopefully the WASP can get there early enough. Also, please let me know the latest on the deck landing requirement. There is a lot of stray voltage out there right now about what is actually required. There is no expectation for the CH-47s to land on an LHD. My understanding is the HH-60 deck landing is somehow dependent on what the HMX-1 white-tops can do on the KAGA. Let me know when this is clarified with the WHMO team in Japan. Also, please confirm #3 will be satisfied.

1. WASP needs to be in port NLT 24 May (22 May desired) for HMX rehearsal.
If not, we need to keep the Reagan in port for the rehearsal and event.
2. Need to use a landing area closer to the JS Kaga for the press heavy lift helo so they can get in place. Staff helicopter can land in the ball field but press helo needs to be closer
3. USS John McCain needs to be out of sight.

V/r,

(b) (6)

Got the same from WHMO today - I passed to CAPT [REDACTED]. It means the JSM name cannot be visible from the WSP and DV 1 locations. If it is visible in the dock from there (Can't remember the visuals from that location) then we will have to get SRF to cover it.

C7F PAO is in the to line - CDR Clay Doss.

Clay - get this worked ASAP with Charlie Brown at PACFLT and see what you can provide.
