

Euro Corporate 3-5 Year Index

The Bloomberg Barclays Euro Corporate 3-5 Year Bond Index measures the investment grade, euro-denominated, fixed-rate corporate bond market. Inclusion is based on currency denomination of a bond and not country of risk of the issuer. To be eligible for the index, bonds must have between 3 and up to, but not including, 5 years remaining to maturity. The Euro Corporate 3-5 Year Index is a component of other flagship indices, such as the Euro Aggregate and multi-currency Global Aggregate Index. The Euro Corporate 3-5 Year Index was created in 1998, with history backfilled to 1 June, 1998.

Composition by Sector (MV%) - May 29, 2020

Composition by Quality (MV%) - May 29, 2020

Rules for Inclusion

Eligible Currencies

Principal and interest must be denominated in EUR.

Quality

Securities must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality:

- Expected ratings at issuance may be used to ensure timely index inclusion or to properly classify split-rated issuers.
- Unrated securities may use an issuer rating for index classification purposes if available. Unrated subordinated securities are included if a subordinated issuer rating is available.

Coupon

- Fixed-rate coupon.
- Callable fixed-to-floating rate bonds are eligible during their fixed-rate term only.
- Bonds with a step-up coupon that changes according to a predetermined schedule are eligible.

Amount Outstanding

EUR300mn minimum par amount outstanding.

Maturity

Between 3 and up to, but not including, 5 years remaining to maturity.

Rules for Inclusion

Market of Issue	Publicly issued in the global and regional markets.	
Seniority of Debt	Senior and subordinated issues are included.	
Taxability	Only fully taxable issues are eligible.	
Security Types	<p>Included</p> <ul style="list-style-type: none"> • Bullet, putable, sinkable/amortizing and callable bonds • Original issue zero coupon • Underwritten MTN • Fixed-rate and fixed-to-float (including fixed-to-variable) capital securities 	<p>Excluded</p> <ul style="list-style-type: none"> • Treasuries, government-related, securitized and covered bonds • Contingent capital securities, including traditional CoCos and contingent write-down securities • Bonds with equity type features (eg, warrants, convertibles, preferreds) • Inflation-linked bonds, floating-rate issues • Private placements, retail bonds • Structured notes, pass-through certificates • Illiquid securities with no available pricing

Rebalancing Rules

Frequency	For each index, Bloomberg maintains two universes of securities: the Returns (Backward) and the Projected (Forward) Universes. The composition of the Returns Universe is rebalanced at each month-end and represents the fixed set of bonds on which index returns are calculated for the next month. The Projected Universe is a forward-looking projection that changes daily to reflect issues dropping out of and entering the index but is not used for return calculations. On the last business day of the month (the rebalancing date), the composition of the latest Projected Universe becomes the Returns Universe for the following month.
Index Changes	During the month, indicative changes to securities (credit rating change, sector reclassification, amount outstanding changes, corporate actions, and ticker changes) are reflected daily in the Projected and Returns Universe of the index. These changes may cause bonds to enter or fall out of the Projected Universe of the index on a daily basis, but will affect the composition of the Returns Universe at month-end only, when the index is next rebalanced.
Reinvestment of Cash Flows	Intra-month cash flows from interest and principal payments contribute to monthly index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the returns universe for the following month so that index results over two or more months reflect monthly compounding.
New Issues	Qualifying securities issued, but not necessarily settled on or before the month-end rebalancing date, qualify for inclusion in the following month's index if the required security reference information and pricing are readily available.

Pricing and Related Issues

Sources & Frequency	All index-eligible bonds are priced on a daily basis by Bloomberg's evaluated pricing service, BVAL.
Pricing quotes	Bonds are quoted as a percentage of par.
Timing	<ul style="list-style-type: none"> • 4:15pm (London time) each day. • On early market closes, prices are taken as of 12:00pm (London time) unless otherwise noted. • If the last business day of the month is a UK holiday, prices may be updated if the European markets are open.
Bid or Offer Side	<ul style="list-style-type: none"> • Bonds in the index are priced on the bid side.

Pricing and Related Issues

	<ul style="list-style-type: none"> The initial price for new corporate issues entering the index is on the offer side; after the first month, the bid price is used.
Settlement Assumptions	T+1 calendar day settlement basis. At month-end, settlement is assumed to be the first calendar day of the following month, even if the last business day is not the last day of the month, to allow for one full month of accrued interest to be calculated.
Verification	Daily price moves for each security are analyzed by the index pricing team. Index users may also challenge price levels, which are then reviewed and updated as needed.
Calendar	The Euro Corporate 3–5 Year Index follows the UK bond market holiday schedule. For month-end dates, the European calendar may also be employed in the event a UK holiday falls on a month-end date but European markets remain open.
