US High Yield Very Liquid Index ex 144A

The Bloomberg Barclays US High Yield Very Liquid Index ("VLI") ex 144A is a component of the US Corporate High Yield Index that is designed to track a more liquid component of the USD-denominated, high yield, fixed-rate corporate bond market. The US High Yield VLI ex 144A Index uses the same eligibility criteria as the US Corporate High Yield Index, but includes only bonds that have a minimum amount outstanding of USD500mn, less than three years from issue date, maturity less than 15 years, and as of June 2013 it also excludes 144A securities that do not also have a Reg-S tranche. The index then applies additional issuer-level caps. Each issuer in the index must have at least USD1bn of index eligible debt, and the index caps the exposure of each issuer to 3% of total index market value. Any excess market value above the 3% cap is redistributed to the remaining issuers in the index on a pro rata basis. The US High Yield VLI ex 144A was created in November 2017, with history backfilled to May 1, 2012.

Rules for Inclusion

Sector	Corporate (industrial, financial institutions, utility) issues only.				
Eligible Currencies	Principal and interest must be denominated in USD.				
Quality	Securities must be rated high yield (Ba1/BB+/BB+ or below) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality:				
	 Expected ratings at issuance may be used to ensure timely index inclusion or to classify split-rated issuers properly. 				
	Unrated securities are excluded.				
Amount Outstanding	USD500mn minimum par amount outstanding for each bond, and then additionally USD1bn minimum par amoun outstanding for each issuer given the minimum bond outstanding criteria.				
Coupon	• Fixed-rate coupon.				
Bloomber	q 🎲 BARCLAYS				

	 Callable fixed-to-floating rate and fixed-to-variable bonds are eligible during their fixed-rate term only. Bonds with a step-up coupon that changes according to a predetermined schedule are eligible. 						
Maturity	 Remaining years to maturity must be at least one year and less than fifteen years, regardless of optionality. Bonds that convert from fixed to floating rate, including fixed-to-float perpetuals, will exit the index one year prior to conversion to floating-rate. Fixed-rate perpetuals are not included. 						
Issue Date	Eligible bonds must have been issued within the past three years.						
Seniority of Debt	Senior and subordinated issues are included.						
Taxability	 Only fully taxable issues are eligible. Dividend Received Deduction (DRD) and Qualified Dividend Income (QDI) eligible securities are excluded. 						
Market of Issue	 SEC-registered bonds and debt issued under Rule index eligible. The 144A securities that do not also have a Reg-S 	e 3(a)(2,) which is exempt from registration with SEC, are tranche are excluded starting June 2013.					
Security Types	 Included Bullet, putable, sinkable/amortizing and callable bonds Original issue zero coupon bonds Fixed-rate and fixed-to-float (including fixed-to-variable) capital securities 	 Excluded Debt issued by emerging markets corporate issuers Defaulted bonds Unrated bonds Contingent capital securities, including traditional CoCos and contingent write-down securities, with explicit capital ratio or solvency/balance sheet-based triggers Bonds with equity type features (e.g., warrants, convertibles, preferreds, DRD/QDI-eligible issues) Eurodollar issues Inflation-linked bonds, floating-rate issues Private placements, retail bonds Structured notes, pass-through certificates Illiquid securities with no available market quotes Partial pay-in-kind (PIK) bonds Pay-in-kind (PIK) bonds and toggle notes (included prior to June 2017) 144A securities that do not also have a Reg-S tranch are excluded starting June 2013 					

Rebalancing Rules

Issuer Capping Methodology	Issuers must have at least USD1bn of index-eligible debt. Additionally, issuers that exceed 3% of the market value of the uncapped US High Yield VLI ex 144A are limited at 3%. The excess market value over the 3% cap will be redistributed on a pro rata basis to all other issuers' bonds in the index that are under the 3% cap. The process is repeated until no issuer exceeds the 3% limit. For example, an issuer that represents 4% of the uncapped index will have 1% of the index's market value redistributed to each bond from all issuers under the 3% cap on a pro rata basis. The 3% issuer cap is applied each month as the index is rebalanced.					
Frequency	For each index, Bloomberg maintains two universes of securities: the Returns (Backward) and the Projected (Forward) Universes. The composition of the Returns Universe is rebalanced at each month-end and represents the fixed set of bonds on which index returns are calculated. The Projected Universe is a forward-looking projection that changes daily to reflect issues dropping out of and entering the index but is not used for return calculations. On the last business day of the month (the rebalancing date), the composition of the latest Projected Universe becomes the Returns Universe for the following month.					

Rebalancing Rules

Index Changes	During the month, indicative changes to securities (credit rating change, sector reclassification, amount outstanding changes, corporate actions, and ticker changes) are reflected daily in the Projected and Returns Universe of the index These changes may cause bonds to enter or fall out of the Projected Universe of the index on a daily basis, but will affect the composition of the Returns Universe at month-end only, when the index is next rebalanced.
Reinvestment of Cash Flows	Intra-month cash flows from interest and principal payments contribute to monthly index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the returns universe for the following month so that index results over two or more months reflect monthly compounding.
New Issues	Qualifying securities issued, but not necessarily settled on or before the month-end rebalancing date; qualify for inclusion in the following month's index if the required security reference information and pricing are readily available.

Pricing and Related Issues

Sources & Frequency	All index-eligible bonds are priced on a daily basis by Bloomberg's evaluated pricing service, BVAL.
Pricing Quotes	Prices are quoted as a percentage of par.
Timing	 3pm (New York time) each day. On early market closes, prices are taken as of 1pm (New York time) unless otherwise noted. If the last business day of the month is a US holiday, prices from the previous day are used.
Bid or Offer Side	 The initial price for new issues entering the index is the offer side; after the first month, the bid price is used. Prior to June 1, 2017, all bonds were priced on the bid side only.
Settlement Assumptions	 T+1 calendar day settlement basis. At month-end, settlement is assumed to be the first calendar day of the following month, even if the last business day is not the last day of the month, to allow for one full month of accrued interest to be calculated.
Verification	Daily price moves for each security are analyzed and compared with other third-party pricing sources by the index pricing team to identify outliers. Index users may also challenge price levels, which are then reviewed and updated as needed.
Currency Hedging	Returns hedged to various non-USD currencies are published for the US High Yield Very Liquid Index ex 144A. The indices' FX hedging methodology takes rolling one-month forward contracts that are reset at the end of each month and hedges each non-reporting currency-denominated bond in the index into the reporting currency terms. No adjustment is made to the hedge during the month to account for price movements of constituent securities in the returns universe of the index.
Calendar	The US High Yield Very Liquid Index ex 144A follows the US bond market holiday schedule.
