# 50% Global Agg Corporate 50% Global HY Corporate Index

The Bloomberg 50% Global Agg Corporate 50% Global HY Corporate Index is the union between the Global Aggregate Corporate Index and the Global High Yield Corporate Index. This index is a multi-currency benchmark that includes both investment grade and high yield corporate bond issuers. The index was created in August 2021, with history backfilled to March 1, 2019.

#### **Rules for Inclusion**

#### Sector

Corporate (industrial, utility, and financial institutions) issuers.

#### **Eligible Currencies**

For the Global Aggregate Corporate Index:

- Principal and coupon must be denominated in one of the following eligible currencies:
  - o Americas: USD, CAD
  - EMEA: EUR, GBP, CHF, CZK, DKK, NOK, PLN, SEK
  - o Asian-Pacific: JPY, AUD, HKD, KRW, NZD, SGD, MYR, THB

For the Global High Yield Corporate Index:

 Principal and coupon must be denominated in one of the following currencies: USD, EUR, GBP, CHF, DKK, NOK, and SEK.

Additionally, for both the Global Aggregate Corporate and Global High Yield Corporate Indices:

• Eligible currencies will not necessarily have debt included in the index if no securities satisfy the inclusion rules.

#### Quality

Investment grade, high yield and unrated securities are permitted. Securities are rated using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality:

- Expected ratings at issuance may be used to ensure timely index inclusion or to classify split-rated issuers properly.
- Unrated securities may use an issuer rating for index classification purposes, if available.
  Unrated subordinated securities are included if a subordinated issuer rating is available.
- For the Canadian Dollar market, DBRS is considered in addition to Moody's, S&P and Fitch. When all four ratings agencies are available, the highest and lowest rating are removed and the lower of the two remaining is used.
- A limited number of unrated securities are included in the EM Hard Currency High Yield sub-component of the Global High Yield Index. The US and Pan-European High Yield Index components exclude unrated securities.

#### Coupon

Fixed-rate coupon (including zero coupon).

- Callable fixed-to-floating rate bonds are eligible during their fixed-rate term only.
- Bonds with a step-up coupon that changes according to a predetermined schedule are eligible.
- US High Yield and Pan-European High Yield Indices: fixed-rate, pay-in-kind (PIK) and toggle notes are eligible.
- EM Hard Currency High Yield Index: fixed-rate and floating-rate (USD-denominated securities only) securities are eligible.

#### **Amount Outstanding**

Fixed minimum issue sizes are set for all local currency markets, for the Global Aggregate Corporate Index, this includes:

• 150mn: CAD

300mn: USD, EUR, CHF, AUD

200mn: GBP35bn: JPY

• 2bn: DKK, NOK, PLN, ZAR, HKD, MYR

• 2.5bn: SEK

10bn: CZK, THB500mn: NZD, SGD

500bn: KRW

For the Global High Yield Corporate Index, this includes:

• US High Yield: 150mn

- Pan-European High Yield: EUR100mn, GBP50mn, CHF100mn, DKK500mn, NOK500mn, SEK1bn
- EM Hard Currency High Yield: USD500mn, EUR500mn, GBP500mn

#### Maturity

- At least one year until final maturity, regardless of optionality.
- Bonds that convert from fixed to floating rate, including fixed-to-float perpetuals, will exit the index one year prior to conversion to floating rate. Fixed-rate perpetuals are not included.

#### **Taxability**

- Only fully taxable issues are eligible.
- Dividend Received Deduction (DRD) and Qualified Dividend Income (QDI) eligible securities are excluded.

#### **Market of Issue**

- Global Aggregate Corporate Index: fully taxable, publicly issued in the global and regional markets.
- US High Yield: securities must be SEC-registered, SEC Rule 144A with or without registration rights.
- Pan-European High Yield and EM Hard Currency High Yield Indices: securities must be publicly issued in the global and regional markets.

#### **Seniority of Debt**

Senior and subordinated issues are included.

#### **Security Types**

#### Included

- Bullet, putable, sinkable/amortizing and callable bonds
- Original issue zero coupon bonds
- Bonds issued through underwritten MTN programs
- Enhanced equipment trust certificates (EETC)
- Certificates of deposit
- Fixed-rate and fixed-to-float (including fixedto-variable) capital securities
- Loan participation notes

#### Excluded

- Contingent capital securities, including traditional CoCos and contingent write-down securities, with explicit capital ratio or solvency/balance sheet-based triggers
- Bonds with equity type features (eg, warrants, convertibles, preferreds, DRD/QDI-eligible issues)
- Inflation-linked bonds
- Floating-rate issues (except EM Hard Currency High Yield Index)
- Fixed-rate perpetuals
- Private placements, retail bonds
- USD 25/USD 50 par bonds
- Structured notes, pass-through certificates
- Securities where reliable pricing is unavailable
- Partial pay-in-kind (PIK) bonds are excluded from the US High Yield and Pan-European High Yield Indices
- Defaulted corporate issues

### **Rebalancing Rules**

#### Reweighting Methodology

This index is comprised of two separate components: The Global Aggregate Corporate Index and the Global High Yield Corporate Index. Each component is reweighted by market value such that they are 50/50. This is done on a monthly basis when the indices are rebalanced at month end.

#### **Frequency**

For each index, Bloomberg maintains two universes of securities: the Returns (Backward) and the Projected (Forward) Universes. The composition of the Returns Universe is rebalanced at each monthend and represents the fixed set of bonds on which index returns are calculated for the next month. The Projected Universe is a forward-looking projection that changes daily to reflect issues dropping out of and entering the index but is not used for return calculations. On the last business day of the month (the rebalancing date), the composition of the latest Projected Universe becomes the Returns Universe for the following month.

#### **Index Changes**

During the month, indicative changes to securities (credit rating change, sector reclassification, amount outstanding changes, corporate actions, and ticker changes) are reflected daily in the Projected and Returns Universe of the index. These changes may cause bonds to enter or fall out of the Projected Universe of the index on a daily basis, but will affect the composition of the Returns Universe at month-end only, when the index is next rebalanced.

## Reinvestment of Cash Flows

Intra-month cash flows from interest and principal payments contribute to monthly index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the Returns Universe for the following month so that index results over two or more months reflect monthly compounding.

#### **New Issues**

Qualifying securities issued, but not necessarily settled on or before the month-end rebalancing date, qualify for inclusion in the following month's index if the required security reference information and pricing are readily available.

#### **Pricing and Related Issues**

#### **Sources & Frequency**

All index-eligible bonds are priced on a daily basis by Bloomberg's evaluated pricing service, BVAL, except CHF-denominated bonds, which are priced by SIX, and JPY-denominated corporates, which are priced by Japan Securities Dealers Association (JSDA).

#### **Timing**

Prices are snapped at the following times:

- North American currency bonds: 4 p.m. (New York time); 4 p.m. (Toronto time) for CADdenominated securities. USD-denominated bonds prior to January 14, 2021 used 3p.m. New York time pricing snap.
- Pan-European currency bonds: 4:15 p.m. (London time); 4 p.m. (London time) for CHFdenominated securities.
- Asian currency bonds: 5 p.m. (Sydney time) for AUD-denominated and NZD-denominated securities; 3 p.m. (Tokyo time) for JPY-denominated securities; 5 p.m. (Shanghai time) for CNYdenominated securities; 5 p.m. (Tokyo time) for all other securities.

If the last business day of the month is a public holiday in a major regional market, prices from the previous business day are used to price bonds in the particular market.

#### **Bid or Offer Side**

Bonds in the index are priced on the bid side. The initial price for new corporate and EM local currency issues entering the index is the offer side; after the first month, the bid price is used.

Settlement Assumptions T+1 calendar day settlement basis for all bonds. At month-end, settlement is assumed to be the first calendar day of the following month, even if the last business day is not the last day of the month, to allow for one full month of accrued interest to be calculated.

#### Verification

Daily price moves for each security are analyzed by the index pricing team to identify outliers. Index users may also challenge price levels, which are then reviewed and updated as needed.

#### **Currency Hedging**

Returns hedged to various currencies are published for multi-currency indices. The indices' FX hedging methodology takes rolling one-month forward contracts that are reset at the end of each month and hedges each non-reporting currency-denominated bond in the index into the reporting currency terms. No adjustment is made to the hedge during the month to account for price movements of constituent securities in the Returns Universe of the index.

#### Calendar

The 50% Global Agg Corporate 50% Global HY Corporate Index is a global, multi-currency index that is generated every business day of the year except for January 1, the only holiday common to all regional calendars. During holidays observed by local markets, the index will still be generated using prices from the previous business day. FX rates are updated daily using WM Reuters 4pm (London) rates. FX forwards are also sourced from WM Company.

#### **Accessing Index Data**

#### **Bloomberg Terminal®**

Bloomberg benchmarks are the global standard for capital markets investors.

- INDE<GO> The Bloomberg Indices dashboard page, which contains daily, monthly, and year-to-date index returns for key indices from each index family as well as a link to index publications.
- IN<GO> The Bloomberg Index Browser displays the latest performance results and statistics for the indices as well as history. IN presents the indices that make up Bloomberg's global, multi-asset class index families into a hierarchical view, facilitating navigation and comparisons. The "My Indices" tab allows a user to focus on a set of favorite indices.
- DES<GO> The index description page provides transparency into an individual index including membership information, aggregated characteristics and returns, and historical performance.
- INP<GO> The Bloomberg Indices Publications page, which includes methodologies, factsheets, monthly reports, announcements and technical notes. A user may also subscribe to index publications via the "Actions" button.
- PORT<GO> Bloomberg's Portfolio & Risk Analytics solution includes tools to analyze the risk, return, and current structure of indices. Analyze the performance of a portfolio versus a benchmark or use models for performance attribution, tracking error analysis, value-at-risk, scenario analysis, and optimization.

#### Bloomberg Indices Website (www.bloomberg.com/ indices)

The index website makes available limited index information including:

- Index methodology and factsheets
- Current performance numbers for select indices

#### **Data Distribution**

Index subscribers may choose to receive index data in files. Files may include:

- Index level and/or constituent level returns and characteristics for any indices
- Automatic delivery of files via email or SFTP following the completion of the index production process after market close
- Clients may receive standard files or may customize file contents
- Index data is also available via authorized redistributors

#### **Index Ticker**

136561US: Total Return USD Unhedged

#### **Index Licensing**

Bloomberg requires index data licenses for services and products linked to the Indices

- Index or Constituent-Level Redistribution
- Exchange Traded Notes (ETNs)
- OTC Derivative Products

- Bond Pricing Service
- Index-Linked Insurance Products
- Custom Index Solutions
- Exchange Traded Funds (ETFs)
- Mutual Funds
- Separately Managed Accounts (SMAs)
